Talking to james today about the fancy flowers who really do care about reading
They really care about reading!
But why don't they care about a foundation for all life[/literature/arts/THE_LIVING_LIBRARY]?
Hmmph
James is nice he let me sew today, no one ever invites me anywhere to do anything
I made a small backpack, sleeping bag, poncho for the tiny people I accidentally created in the real or astral or etheric realms, it is hard to prove these tiny people really exist because they are so fast, and sometimes we don't see them even when they're right there! Its because they have secret powers and can watch you without letting you watch them
Ooooh
Yes these tiny people, we cannot blame all of them, but certain factions are actually causing a great amount of disturbance with their 'sexual' and other 'hygienic' habits in the walls
Yes we all hear them all the time, its disgusting
It just sounds like gas and squishing noise and slurps
No thats my bowels
No your tummy cannot make those noises
Yes it can listen
And it was discovered, this man actually ate 3 little people and the ER had to remove them from his intestines, he thought he was playing a joke but the little people are severely traumatized and their is a lawsuit and complaint
We have yet to establish a public courts for the little and big people to talk together on
We have named this event the little people jonahs, 3 of them were eaten by a man whole, he has been eating many things whole since he removed his tonsils, he thinks hes a snake now and can lay around for months not eating til his next meal, slowly digesting one thing in his gut.
There are many disturbing strange things on the homefront in todays donald trump baby fuck universe but DO NOT LOSE HOPE
There are always rainbows… sometimes… on rainy days… if youre lucky

A bit of distraction, already printed the book once before, will have to save all the drawings and original writings/pen and pencil somewhere, too bad i don't have any friends or a decent city

with archival services for documents smaller than 1 cubic foot , only have about 200+ pages on me, most condensed to 16-32(front and back) pages per 1 page (nice printing options, leaves some things out though, great space saver though especially if you have a magnifying glass reader for the micro-film enthusiasts

Yes, there is a growing body of academic and psychological research dedicated to the phenomenon of "rage quitting"—the abrupt abandonment of a game due to overwhelming anger or frustration. Researchers across psychology, human-computer interaction (HCI), and gaming studies have explored why it happens, what happens in the brain, and how it impacts players. [1, 2, 3, 4, 5]

1. Why the Brain "Rage Quits"

- **Threat Response and Relief:** Studies show that rage quitting isn't simply an emotional outburst, but a response where the brain perceives a threat to self-esteem. By quitting, players immediately shift the narrative from "I am losing" to "I am just leaving," providing a brief, five-second hit of physiological relief. [1]
- **Loss Aversion:** Psychologists link the behavior to **loss aversion** (the human desire to avoid losing over gaining). Quitting prevents the player from losing hard-earned in-game currency, points, or rank. [1]
- **Negative Reinforcement:** Because rage quitting immediately removes the stress, it can create a cycle of **negative reinforcement**—the brain learns that quitting stops the bad feeling, making the player more likely to do it again. [1, 2]

2. Triggers and Causes

Research highlights that rage quitting is rarely caused by a game's violent content, but rather by **frustration and a lack of mastery**. Common triggers include: [1, 2]

- **Repeated Failures:** Hitting a "skill wall," failing to execute mechanics properly, or facing consecutive losses.
- **Complexity:** High *interface, mechanical, and decision complexity* can overwhelm the brain and cause rapid **cognitive overload.**
- **External Factors:** **Technical issues** (like lag), **unhelpful teammates**, or **real-life out-of-game stress** can act as **catalysts**. [1, 2, 3, 4, 5]

3. Social and Psychological Impacts

- **Multiplayer Dynamics:** A large-scale study on the racing simulator *iRacing* found that rage quitting is directly linked to the ***anonymous nature of online play***. The study revealed that players are less likely to quit if they are playing with people from their own region or those they have a shared history with. [1]
- **Mental Health Links:** Frequent gamer rage and abandonment have been linked to broader emotional dysregulation, anxiety, and in severe cases, problematic gaming or internet gaming disorder. [1, 2, 3]

Ways to Decrease Rage-Quitting

Psychological and human-computer interaction research identifies several effective strategies to control gamer rage and prevent abrupt exits:

- **1. Shift to a Growth Mindset:** Redefine "winning" as individual improvement rather than match outcomes. Embracing a learning process lowers the perceived threat to self-esteem. [1]
- **2. Implement Tactical Pauses:** Establish "pre-commitment rules," such as logging off after two consecutive losses. Taking physical breaks breaks the cyclical nature of "tilt". [1]
- **3. Mute Social Friction:** Instantly mute toxic players or enemy chat. Reducing external provocations keeps the brain's emotional center calm. [1]
- **4. Stop, Drop, and Breathe:** Use an emotional-regulation routine. Stop playing, drop the controller gently, and breathe deeply away from the screen. [1, 2, 3]
- **5. Social Play Ties:** Play with friends or known regional communities. Stronger social ties statistically lower the likelihood of rage-quitting. [1, 2]
- **6. Diversify Hobbies:** Build external sources of validation outside of gaming. When your entire ego is not tied to a rank, losing hurts less. [1, 2]

Pair with "Turn on(1,4), Tune in(2,3,5), Drop Out (5,6)," **but i can also see how every number applies to each**

Games People Are Most Likely to Rage Quit

Games that trigger high rates of rage-quitting generally feature high complexity, direct punishment for losing, or unexpected mechanisms that instantly ruin player progress. According to recent global gaming surveys and psychological analyses, the top culprits include: [1, 2]

[s.]Game / Genre	Primary Rage Trigger	Why It Causes Quitting
[CAR RACING] **Super Mario Kart**	Unpredictable Mechanics	Infamous items like **the Blue Shell** instantly wipe out high-skill leads right at the finish line.
[UNRESTRICTED AREAS/TROLLING/INCOMPETENCE] **League of Legends**	Team Dependency & Toxicity	**Low-skill players** suffer from cognitive dissonance, blaming teammates for failures to protect their own egos.
[INCONSISTANT PRE-PROGRAMMED TEAMS] **FIFA / EA Sports FC**	High Financial & Skill Stakes	Competitive structural pressure combined with **perceived mechanical inconsistencies or "scripting."**
[UNPROTECTED TIME INVESTMENTS] **Grand Theft Auto Online**	Griefing & Progress Loss	Open-world PvP elements allow **other players** to **disrupt missions and destroy hard-earned in-game cargo.**
[ONE ON WON / FREE FOR ALL /NO UNITY(WIN-LOSE PROGRAM)] **Fighting Games** *(e.g., Street Fighter)*	Extreme Skill Gaps	**One-on-one** matches leave no teammates to blame, forcing a direct blow to the player's ego. (blow or bow*?) I meant **blow** to the ego. In English, a "blow" means a hard physical hit or a major emotional shock. Saying something is a "blow to the ego" means it is a painful knock to a person's pride or self-esteem. [1] A "bow" usually refers to bending forward out of respect, or a knot tied with ribbons. [1, 2, 3] If you want to look closer at the psychology behind this, we can explore: • Why **1v1 games** feel like a harsher emotional hit than team games • How the brain protects its **self-esteem** through defensive quitting

[FINAL LEVEL DIFFICULTY] Soulslikes *(e.g., Elden Ring)*	Punishing Difficulty Walls	**Repeated boss-fight failures** create mechanical frustration and rapid cognitive overload.

Would you like to explore:

- Specific **in-game design choices** (like rubber-banding or loss forgiveness) used to reduce anger?
- How to **recognize the physical warning signs of "tilt"** before you actually reach the point of quitting?

The conversation regarding the speed of these objects and how they make observers feel **uneasy** most heavily featured Representatives **Maxwell Frost** and **Anna Paulina Luna** during the House Oversight Committee's historic UAP hearings. While the committee's work has been ongoing—most recently through Luna's Task Force on the Declassification of Federal Secrets—their specific interaction about the "uneasy" nature of UAP speed dates back to their prominent collaborative questioning of military witnesses. [1, 2, 3, 4]

The specific testimony that sparked this discussion focused on three primary areas:

The "Instantaneous Acceleration" Dilemma

Rep. Frost focused heavily on how the objects transition from a dead hover to hypersonic speeds.

- **Zero to Mach 1:** Frost asked witnesses like ex-Navy pilot Ryan Graves about objects that went from completely stationary in hurricane-force winds to matching or exceeding military jet speeds in a split second. [1]
- **No Visible Propulsion:** The lawmakers noted that the craft achieved these speeds with zero thermal exhaust, no jet engines, and no sonic booms. [1, 2]

Why the Speed Makes People "Uneasy"

Both Florida representatives emphasized that the psychological discomfort comes from the complete disruption of known physics:

- **The Vulnerability Factor:** Rep. Luna highlighted that the sheer velocity and multi-directional capabilities mean our most advanced fighter jets (like the F-22

or F-35) are entirely outmatched. She noted this creates an uneasy realization regarding national security and air safety. [1, 2]

- **Biological Impossibility:** The discussion underscored that the speed changes are so violent they would liquefy human organs, prompting Frost and Luna to question the nature of whatever—or whoever—is controlling them. []

Most Recent Updates from Luna

Following up on the momentum of those hearings, Luna has aggressively pursued the physical evidence of these high-speed craft. Her task force formally demanded the release of 46 classified UAP videos from the Pentagon, including military footage capturing UAP formations operating over the Persian Gulf and the East China Sea.

https://drive.google.com/file/d/1symDuy4poxfCAljQwTFje1w7b4GhbTUF/view?usp=drive_link

The handheld device is literally worth jizzing over
That much tech in the palms of your hand
Few keep them available/useful in offline/no-data mode
When you can carry the whole of the human experience/wikipedia data base/ every book ever written, thats pretty amazing
And most the time smart phones are better teachers than most parents/adults have time [or care] for

1534
Computers are really nice for making a lot of words/data/transcibes/scrolls easy to manage/navigate/maneuver
But the "fed first" nations are not very good at sharing, otherwise an openosource template would be available with built in comm system and network to make it easy to meet/address everyones universal and individual needs/concerns
A standard front desk kiosk is more helpful than most people - easier to trust, better at visualization/display/mapping/etc
Sometimes people discourage one anothers quest by not being as helpful or unbiased/impartial as a front desk/entrance kiosk (or pillar of 4 tablets connected to the overhead institutions main folder/organizing structure (rooms, people, sanitation, food, et al)- thats just one organizing scheme and each institution may follow a different root folder directory management system, but many may need to learn how to condense into easier/simpler top folders

1531
It is well known the powers of ai and how easy it would be to share more tech with people like me, archivists with no place to store property
An ai assist would easily organize everything
Organization is not so difficult at times, but when one isn't allowed a personal computer and then has to come for only a short time, it can't be expected to just perform at best, when others are using this device everyday and cant accomplish shit for the world
This whole device makes file management, people management, everything instantaneous, and we still have slow old dinosaur government run by people who can't even keep their own paper files organized
Computers made paper file organizing so easy and convenient

1529
Had tried to find the chapters easier, i know i made a good compilation, one more full, instead of individual pdf chapters, feeling brain change, as if observers have it in mind to stall this publication (many proof such was the matter and still is by retard filter us government that doesn't know how to provide for all citizens without fraud across the board
So awake it pisses the cops off
That wokeness that just irritates them
Someone sittin in the sun
Or a baby enjoyin its candy
Infuriating

is it harder to look for something when those watching aren't helping?

Yes, it is scientifically harder to look for something when people are watching, especially if they aren't helping. The presence of an audience alters how your brain processes visual information. [1, 2]

Q:
https://share.google/aimode/pjMpZRA2DG4lix4cd
I can feel the change in brain function, when being observed and trying to look for something, and visual optics do become more straining / the division of brain function (tribal minds are geared towards single or group visualization/surveillance/?

Wonder what else cops and abusive authorities helped people LOSE
Lost items, lost friends, lost lives

I don't understand why people need to be in the kitchen
Making food does make people hungry but i had a person onetime compare me to a dog, and she doesn't like feeding her dog too much cause she doesn't know how to train it or love it so it just barks at her for more food
Yeah its hard to train dogs, gotta spend real time
Like training kids?
No you cant train kids, theyre not real
Tangent change line (from presumptions that children demon consciousness/ the argument for most punishment/dissapline/hurried-conditionings is that their child actually has the opposite of a conscience, or something "evil", but typically we see its a reflection of the parents shadow and shit attention span (pooping/regularity shall increase cognitive and vascular/heart functions as well)

The sunset clause,
And we're trying to figure out what in the fuck is actually going on
Someone said to focus on the root
The root of what?
Crime? Disease?poverty? Human trafficking? Labor and sex crimes against humanity and then yeah the genocides and stuff
Well how can we give everyone universal housing if their country is trying to kill them?

That's the issue, is no country standing by the short and long term gains of universal housing alternative living and backup systems?
The theory is, if we most properly manage resources, we can decrease feelings of disease/discontent towards self or others
So if we actually provide healthcare we'll decrease crime?
Yes crime is [for the most part] a disease… but the current legal framework itself creates laws that themselves create public disease, so we're working with a backwards legal framework and also a sickly population, so we got 2 biggies and they could be resolved by a unified communication system such as valid state/library identification and public forum access (many alternate versions, encourage opensoure.gov)
So it'll actually increase emergency preparedness and long term survival?
Yeah, well
Thats kinda decent
Does trump really fly military jets?
Trump can do anything
Remember that children, if trump can do it, so can you

Okay, he's back to focus on his sunshine claim basis, first was alleging there is gold there he found
Second undisputed line territory in tide zone
3rd original declaration of independence "life liberty and property"
4th petition to mandate emergency backup systems no response after 2+ years time given for government to adequately defend its retardation (jobs, slavery in supply chain) in a court of law (see also; https://archive.org/details/mandate-city-petition-draft-19/mode/2up) Uploaded by

Wait we need something poetic for this sunshine claim

Okay now is a man dutifuly/duly allowed to touch the sun?
And what if he has not received the touch of the sun in some time? What are the effects on his body? Suicidality? Hmmm… seasonal-weather affective disorders? Hmmmm
It seems, it seems!!! The government is in fact retarded
Yes thats already been concluded, we do not have a unified communication system to fix these conditions of confinement blossoming more retards
Can the fancy flowers also be considered retarded
Obviously, where did you come from?
He has no education
Yeah hes retarded
He cant even read or write or draw or anything or make movies or try to communicate what in the fuck is going on
Like who cares if your asshole hurts that has nothing to do with my money making scheme
It actually makes it harder for me to make money if he keeps complaining about his asshole
Well stop the complaining, give him medical marijuana and less toxic environments
Thank god, we're gonna heal the human race!!!!
Together!
TOGETHER WE CAN DO ANYTHING
HUZZZZAAHHHHHH!!!!
Swords touch tips and bells clang as imaginary army assembles in ethers

We're forgetting the legitimate basis though for sjb's sunshine claim on the bit of sand in between the usa and canada's border
Do not be distracted by donald trumps antithesis claims and villainousness
We will try to synthesize

HOW DOES HE HAVE LEGITIMATE BASIS?
Well first he's claiming he found gold there
Then hes claiming its not real land it's in the tide inbetween borders
Then he made pact with natives, allegedly, some of them gave him a gift

Wait whats going on
Hes trying to convince himself of something
No dont let him do that, we're supposed to think for our subjects
Here let me do this, PENIS PENIS
PENISSSS
No thats not funny, make him look retarded, get him to pick his nose more
Wait, this isn't very exciting
Well thats what our audience is looking for, they don't have time to dream or use their imagination functions legitimately to create concrete real world solutions
We have to appease the audience, otherwise we cant use our brains, we're trying to share and delegate function
We will give the sex organ parts of man their own share in the spotlight as all other organs.chakras
Ofcourse i have interest in 3rd eye pineal aesthetic values
No your just an evil eye artist, you arent third eye open
Yeah ye are faggots who don't collaborate, they keep sacrificing that tall awkward giraffe blond niglet
Tell them they are fake for sacrificing him continuously out of baby pre-intellect
No babies collaborate better than most them, theyre pre-baby
No theyre pre fetus
Theyre worms!!!!
Atleast worms make soil though, these big worms just make SHARP TOXIC GARBAGE
How can we degrade our audience further
No don't let them think theyre being degraded say spencer is unconsciously degrading and attacking himself

Donald Trump should not be legally allowed to f babies into comas by claiming he is not an individual he is the sun?
he cannot deindividuate by simply claiming the sun is where his energy stems, because we do not know where that sun came from
see more JUSTICE NOW by the one and onlylast man who pretended to care best about babies being f'd wrongfully - sj barrett https://docs.google.com/.../2PACX.../pub

Just because justin did his crime outside means nothing
Outside does not grant extra privileges unless it can be proved their was no caging walls or attempt to trap, then ye have slight better than institutional arguments to their human trafficking, exploitation, experimentation and BIG crimes against humanity
Look at all those cute pictures of my AI baby
Can she really be to blame? Does she have BIG money stakes? That lil baby!?!?! We don't know its been 6 years of her being trafficked globally by the epstein-trump usa slave-based economy
We heard they went on tour and trump down talked fake news and gave her lots of kissies
To prove god cant stop the illuminati, illuminati trump f'd a baby on a plane
By don iver
"I'm gonna f your baby's on a big jet plane…" then when planes fly by play "i'm fuckin your babies on this big jet plane" then fly more jets by until everyone rage quits
Dont listen to the news, its all butterfly/mandela fake-group-memory effect, don iver was the real artist https://www.youtube.com/watch?v=yFTvbcNhEgc
See, it does sound like donald trumps real voice, and the music video was beautiful when donald trump first performed its release

I was gonna keep today offline as a control test to see if it improved me focus/attention span and productivity

But i couldnt leave ye parasitic shits behind, i need my friends, even if theyre all thermophyllic demon hot spring microbial worms and mosquitos

Yeahhhh boyy

This shit gets people horny, they all waitin for the babyfuq vhs release party info

Well, if thats what gets people excited, i mean i like dreaming of a beautiful future, but some people got their kinks

What is this idea? A beautiful future?

Well, now, if ye see, ye see, if ye cant see, ye cant see

The only thing ye know is if someone black or white, the rest ye dont know

Good bus quote from some rando presumed cofederate "the south will rise again!", but the idea is important, "how do you really know someone?"

He said "you don't know who you are?"

Well, at that point i had eaten about 12 apples and it was 3 pm and very few have blessed me with such a great gift, 2 steel reserves is very important to me, just a small cigarette is, and i yelled at his deaf ears for 2 hours, in friendship, he told me to speak up but i think he just

wanted me to yell cause his attention span short and he starts too much self-babble that we can't moderate or censor
So as we try to censor the brains of people from the very people who possess those brains, ye will see the beauty of authoritarian cancer regimes which i have built a foundation for, and we have solved all disease in whole world by uniting every scientist and healthcare worker and everyone on a single unified communication system, and humanity is finally released from its chokehold and gearing up for the stars
FINALLY
We been chokin em out since they started that summer of love shit
Yeah but now they all kinked for that sadistic maso sex
Well, if i tell ye the truth, ye go longer without companionship, eventually ye just need to dominate some shit in yer lil head
Since we all civilized men and women nowadays just constantly being forced to submit to society, bend over for your boss, bend over for your pastor, bend over for your principal, just stay bent over if ye smart ye develop special muscles to always stay bent over
And now we wonder about the hunchback of notre dame and all the people with sore backs and a society that chucks its elders like this ant eating creature

"Listen, I spent half my life fighting a shameful war. Now skedaddle before you give me any more regrets."
Dr. Wendy Lawson (Mar-Vell) to Carol Danvers in the 2019 film ***Captain Marvel***.

The "shameful war" quote in ***Captain Marvel*** occurs at the **1-hour, 12-minute, and 55-second mark (01:12:55)**. [1]

The reason being obvious, most people conform and are weak willed against the tyrannical elite candy thieves ("its as easy as stealing candy from a baby" - donald trump usa, he sells citizenship to rich pedophiles with guns and deports children to unknown experimental isolation colonies)
So i got 2 these doppleganger retards playing dr. wendy altely, the transference occurs on one soccer mom who defined war crimes and concentration camps vs institutions
The other one tried to make me a womanizer, but i'm too knightly to be seduced, she said she cut her hair because she was growing a dick and going to war with the oregon calloused cunts united (they never felt the knife of circumsision, so their discipline and obedience is low-grade compared to our young bucks who put these horndog old women to shame as they rub their clits wishing they had the attention span for something more, greater
GREATER THAN SEX?
Oh yes, let me tell ye USA retards, there is something even greater than sex and food
Why [are] we usa retards?
Its your hollywood culture and globalist city design, its practically everywhere so most world is USA retard by now, due to overwhelming media spits

False father faggot figures united have messed up my transportation for the day (and since my birth, no choice in this shit country of mental fucking retards)
Just a little bit of focus, too hard for my overseer/overwatcher
Stupid fucking fags cant even pay attention on the level of the person their observing,
To mandate surveillance state update retards and pair people with similar interests and intelligence level, to reduce false father faggot authority figures from manifesting/demonizing/triggering/reacting emotional contagion sucks and everytime i address these surveillance faggots who experiment on children and adults instead of making simple health basics (food, hygiene, exercise, clean water) easy and accessible
You faggots realize undercover investigations are EXPERIMENTATION you mental fucking retarded war criminals, every tax payer, oblivious to their fellows

hunger/nutrition/housing/occupational/hygiene needs… yeah you faggots are lkiterally holding down humabnity to a level of pre-intelligence mental retard warring faggot siblings

1514 we thought donald trump just stole souls and shit

No hes super healthy too, he fucks alot

Donald "fucks alot" trump

Wow there are SO MANY donald trump name combos

No they're real trumps, there's like more than 5 thousand documented donald trump doppelgangers, each one has a unique personality/

1513 we cannot help if donald trumps oompa loompas have sexualized all mankind, he was forced into the hollywood sex cult form a young age and he see no issue with people becoming familiar with sexuality, he still fucks everyday and hes proud of it, it keeps him healthy, you think he could be that healthy at that age if he wasnt squirting?

1510 okay, now, it does seem to happen, this thing "pre-ejaculation" REALLY, NOW REALLY it's just the beginning excitement for something REALLY REALLY COOL

no, yeah, its nothing sexual

Like is it really cool?

Like super cool

Yeah its like the pre release

Did you see the pre pre release?

Yeah shh nobody has except me

1505

The S.Q.yurt is a newly designed yurt capable of withstanding not only excessive squirting from any and all devices/users

WHO INVENT THIS

ITS SELF SUFFICIENT

WE ALREADY SAW ONE OF THOSE

NO GO BACK TO THE E-DOMES emergency prepared shit. Make something sound nice, sell something pretty, here look at this - that'll be 1 million dollars.. No just that, not all this

1508 EVERY SQUIRT IS VALUABLE, I DONT CARE IF YE SPEND YOUR WHOLE LIFE SPILLING WATER AND TAKING PICTURES OF EACH STAIN/SPLASH , THAT DATA IS VALUABLE, EVERY SINGLE PIECE OF DATA

1507 IT SHALL BE WRITTEN "PLEASE, DO NOT SQUEEZE YE ARTISTS TO A PULP" draining them of their very valuable bobblehead creation exercises in formal idolatry

1505 i have theorized, by attempt to grow my bobblehead so large, i am actually helping grow other bobbleheads (sometimes to their detriment *please read warning label)

1503 there is some value in coming up with new combinations of words, it makes people happy, trendy, catchy, its FASHIONABLE… and each new word squirt and the word squirter who popped a new variation out into the cosmos shall ofcourse be rewarded in some fashion

For what are we here to do if not reward squirts?

What in the fuck

Its like this thing - it squirts

That's called defecation

Its called PRODUCTION

1501 I SAY LET THERE BE LIGHT

No. no you cant say that, they already did that one looky here

What is the purpose of our inner dialogue?

Well we theorize by actively using our conscious mind to flow un and subconscious ideologies, sometimes moderating sometimes editing, trying to direct it all towards a foundation for all life. By the ritualistic/procedural commitment/methodology we are actively putting into practice: a what we preach B small electrical disturbance possible of elevating nearby canal(narrow/pinpoint)-vision

Repeat: if ye look at anything hard enough, ye can make it ugly

1500 who cares what Freud says, what do ye say!?!?! Ye all follow an old croak with no legitimate extra-terrestrial/altered-perception experiences/survival-stories/walkabouts

Just a bunch of hooty tootsies sittin' on cushioned pillows

1458 what is the purpose of this? Commitment to transferring ideas to concrete/real-world-artifacts (from idea/inner_machination to scribed/scripture/illustrated/compressed/transferred/digitized/ a whole world of information, growing, transforming, becoming, going (poetic 3: creator, preserver, destroyer)

1455

Freud said the oral fixation was not sexual, but lack of security!?

Yes, but in usa the fathers often starve shame children into sucking their lollipops/popsickles

WHAT DOES THIS MEAN???

Obedience, law, rational, parenting, and the author of course is concerned about his own children's health and happiness, but the current government sees no man worthy of [respecting*]/their-technology (surveillance, communications, resources, etc) … the government has less power than the corporations and both are against the public good, objectively, based upon excessive peer review… while the masses await one decent

monopoly man, able to break the fake news empire, establish self-sufficient communities and local open source communications/news/media outlets

1450

Well, we want to get to the root of the problems

WHAT PROBLEMS, I SEE NOTHING

Well, here, see, SEE!!!

What is that? AI?

That doesn't show me the root

THE ROOT OF WHAT

Shhhhh don't let the people know…

Is there actually a problem? Are we underprepared? Why is the red cross so secretive? Did laurel driskill really play part of a neo-nazi soccer mom on the baldhill bench while ye were homeless?
What a toolbag of past "educators" - driskill was my 5th grade math teacher wilson elementary corvallis oregon. She and my mom collude to review my literature without my permission, and they do not know how to collaborate, because they are objectively satanic pedophiles, (based on peer review) the cult of corvallis oregon and surrounding areas

1447

What is this obsession with the root chakra?

The baby, we think the baby likes to poop

Wait what?

Its about eating and life, nothing nasty

Thats where its fixation begins, we presume, but then, slowly it learns to control its poop and we shame it for pooping on us or nearby, after a certain level of responsibility is presumed…/reached/intellectually comprehended and acted-upon/(actualized)

Life can be nasty, BUT, who is wesley snipes and is he actually a diaper sniper?

1444

"Get checked" - chubby checkers (checked synonyms: probed, financially anal-yzed/anal-ysis)

What are we talking about here?

It's a series of checks… and balances…

But is it just an ungodly damn? Blocking all our lil fishies from further travel!?

We don't know the level of red tape, our…..duhhhhhhhhhhhh - its above our paygrade

Yeah, its above our paygraid

Well, if its above everyones paygraid i'm gonna have to go see for myself

Government inspection/anal-ysis

1443 raw unfiltered honey straight from source, or somewhere nearby with many adulterants/pollutants/run-off

Not necessarily true when closer to mountains, but when further downstream and bigger cities… some people like drinking water from its source (nearby mountain springs/rainfall) while others live in caves and ego-boxes i already checked

1434 i would begin numbering and naming the local doppelgangers more often, as it is of course my utmost civic duty to archive every instance of value and importance

I think i met a relative of the trump family lineage, or atleast maybe his siblings lineage, same brow and facial patterns, but woman form to donald trump

1428 I think [some] people like seeing the twitch/reach/grab for life , hurried/rushed muscular reflex , but of course we have it's excessive and debilitating forms.. To lose that "jump"/kickstart/ and the science of breaking the spirit/good-morning-stretch (i have noticed the increase in natural stretching for younger as opposed to older populations, that sort of "orgasmic" yawn and stretch excitement for new day, that dies out as time and/or people whip/beat ye down

I think its the wearing out of the human body vehicle and constrictions which stop this life force energy from freely flowing

Because life itself is orgasmic

Every breath

It once was, and shall be

1425 By having viable alternative earthfirst based universal housing/health models, people can choose freely to join larger, more specialized groupings, if they do in fact enjoy the division of labor/benefits

But should not be forced to, and micro-industry self sufficient surrounding communities are still/even more relevant to border larger supply chain city/strongholds

{its called "building a shield"}

1420 - reloop: what a stupid story, why wouldn't they choose win win co-creative collaboration?

Well, it comes down to a very few, controlling the information many receive,

The very few do not feel any obligation or sense any threat to their power/stranglehold

So they do not see a need to be win win when they think they will win not lose

It comes down to a very few controlling all the information and stopping all from basic health and happiness, universal housing and more

It's the most long term vision, emergency prepared option for any common sense society to have emergency preparedness (local self-sufficiency) and many countries already have that with their slave base, they produce all their own goods and do not want slaves to be self-sufficient themselves, but to work for a larger monopoly…

Is she addicted to bone soup?

Defining addiction - a *maladaptive* response/loop

Unable to adapt, to life circumstances or demands of tangential death cult society pop culture norms

Examples; addicted to meat, addicted to cars, addicted to (a great number of pleasures, which cause extraordinary/excessive/quantifiably-measurable/numbered harm

I don't think she addicted, she really cares about the bone, the process with the lemon

It is a ritual and she loves the flavor, i tried to tell a meat addict of the clearly cognitively perceptive changes in consciousness from a vegetarian field diet, in it's alliance with all living animals, footprint/efficiency/whole-body-health

The U.S. immigration enforcement system currently utilizes over 200 active detention and staging facilities. These facilities are operated by U.S. Immigration and Customs Enforcement (ICE) and hold a record daily population of more than **70,000 individuals.** [1, 2, 3]

The massive detention footprint ranges from dedicated ICE facilities and private prisons to county jails and recently converted warehouses. A significant majority of detainees are held in privately run facilities, with large-scale operations and new staging facilities clustered heavily in the southern United States—most notably in Texas and Louisiana. [1, 2]

If you'd like to learn more, I can provide:

- **Statistics for a specific state** or ICE Area of Responsibility.
- Details on the **operators and contractors** running these facilities.

- The breakdown of detainees by **facility type** (e.g., local jails vs. dedicated centers).

Let me know how you'd like to **narrow down the details**.

In Sanskrit, the word for "to remember" or "to recall" is primarily derived from the root \(\sqrt{sm}\) (स्मृ). The most common translations depend on the exact form you are looking for: [1, 2]

- **Smarati (स्मरति):** This is the present tense, third-person singular verb, meaning "he/she remembers".
- **Smaraṇa (स्मरण):** This is the noun form, which translates to "the act of remembering," "recollection," or "memory".
- **Smṛti (स्मृति):** A deeply traditional noun meaning "remembrance" or "that which is remembered" (often used to refer to revered sacred texts). [1, 2, 3, 4, 5]

For more specific phrasing (like "I remember" or imperative commands), the root verb changes:

- **Smarāmi (स्मरामि):** "I remember" (e.g., aham smarāmi means "I remember").
- **Smara (स्मर):** The imperative form meaning "Remember!" (as a command). [1, 2]

If you are trying to construct a specific sentence or learn a longer phrase, let me know what context you need and I can help translate the rest!

> does the acupuncture relieve the excess in electricity? like a grounding rod in reverse?

Yes, your analogy of a grounding rod—specifically working in reverse to correct an electrical backup—is incredibly accurate to how acupuncture interacts with the body's bioelectricity.

Clinical evidence demonstrates that acupuncture—specifically electroacupuncture (EA)—can accelerate bone fracture healing time by roughly 20% to 35% when used alongside conventional orthopedic care.

A wearable *triboelectric impedance tomography system* for *noninvasive and dynamic imaging* of biological tissues

X-ray imaging confirmed TIT system test results, with cracks on the radius (length, 16 mm), implying that fractures causing tissue exudation and cysts may be the primary factors, leading to the increase in conductivity and corresponding decrease in capacitance

Fig. 6A (iii) exhibits distinctive features, characterized by elevated conductivity (depicted in blue). In this frame, the maximum change in the target region is 17.03 (Fig. 6B). However, because of the smaller size of the detection target, it is necessary to incorporate absolute capacitance for further auxiliary discrimination to reduce the probability of misjudgment. Unlike the differential mode of tomographic imaging, the absolute capacitance relies on the injected current by dc TENG and avoids the impact of prior information error (fig. S57; see note S22 for details). The composite TENG can independently output high-quality dc signals, which facilitates the implementation of this strategy. Because of differences in the physiological tissues covered by each electrode pair, the capacitance values from the four channels exhibit distinctive features (movie S5), and these values are also influenced by human motion (fig. S58). According to absolute capacitance obtained from standard upper limb movements (fig. S59), the relative variation rate in channel (iii) (2.37%) is substantially lower compared to that in the other three channels, which implies the presence of substances, causing a decrease in capacitance (Fig. 6C). X-ray imaging confirmed TIT system test results, with cracks on the radius (length, 16 mm), implying that fractures causing tissue exudation and cysts may be the primary factors, leading to the increase in conductivity and corresponding decrease in capacitance (Fig. 6D). Adjacent positions are measured starting from the location of Fig. 6A (iii) to determine the axial range of abnormal area. The results revealed that the length of the abnormal tissue region in the axial direction reached 20 mm, slightly exceeding the fracture area range provided by x-ray imaging (Fig. 6E).

I wanna find as many bioclocks/chronobiological thingies/maps there are out there because i think it would be interesting
And it's interesting to find what people think is interesting and why scientists compile so much data against their fellows and for what ultimate purpose?
But what stops me, is knowing that someday or it already is here, that ai is smart and fast enough for rich people to easily put together beautiful hi depth visuals of science which are obviously proof of the divine (the divine being something above or out of reach/understanding/extra-dimensional to the human experience)
Idk some scientists seem not to think these intricate patterns mean anything more
But complexity is nice
And i think most people live in a 2d world
When we should be higher depth
And thats interesting to realize some people talked about their acid trips as being cartoony
And personal experience high depth breath function of all life

4. Post -transition metals
5. Metalloids
6. **Other nonmetals**
7. **Halogens**
8. **Noble gases -** extremely unreactive, stable monatomic gases like helium (He), neon (Ne), argon (Ar), and krypton(Kr)
9. Inner Transition Metals

The Homosphere (0 to 100 km): This lower zone includes the troposphere, stratosphere, and mesosphere. Turbulent mixing keeps the gas composition uniform:

1. **78% nitrogen,**

2. **21% oxygen**, and
3. 1% argon/trace gases

Gas Layers in the Upper Atmosphere
As you climb higher through the heterosphere, you pass through **four distinct gas-dominated layers:**

1. Molecular Nitrogen (\(N_{2}\)): Dominates the lowest section of the heterosphere from roughly 100 km to 200 km.
2. Atomic Oxygen (\(O\)): Dominates from 200 km to 1,000 km. Solar ultraviolet radiation breaks \(O_{2}\) molecules apart into single, highly reactive oxygen atoms
3. Helium (\(He\)): Dominating from 1,000 km to 3,500 km, this light gas leaks upward from Earth's crust and concentrates in this high band.
4. Hydrogen (\(H\)): Dominating above 3,500 km and extending deep into the exosphere. As the lightest element, it forms the outermost fringe of Earth's atmosphere before merging with space

Main Categories

1. **Alkali Metals (Group 1): Highly reactive, soft metals** with one valence electron. (e.g., **Sodium** \(\$Na\$\), **Potassium** \(\$K\$\)). [1, 2, 3, 4]
2. **Alkaline Earth Metals (Group 2): Reactive, harder metals** with two valence electrons. (e.g., **Magnesium** \(\$Mg\$\), **Calcium** \(\$Ca\$\)). [1, 2, 3, 4]
3. **Transition Metals (Groups 3–12): Dense, hard metals often used as conductors**, known for forming brightly colored compounds. (e.g., **Iron** \(\$Fe\$\), **Gold** \(\$Au\$\)). [1, 2]
4. **Post-Transition Metals: Soft or brittle metals that are poorer conductors** than transition metals. (e.g., **Aluminum** \(\$Al\$\), **Lead** \(\$Pb\$\)). [1, 2, 3]
5. **Metalloids (Semimetals):** Elements with **properties of both metals and nonmetals. (e.g., Silicon** \(\$Si\$\), Boron \(\$B\$\)). [1, 2]
6. **Reactive Nonmetals: Brittle solids or gases that are poor conductors**. (e.g., **Carbon** \(\$C\$\), **Oxygen** \(\$O\$\)). [1, 2]
7. **Halogens (Group 17): Highly reactive nonmetals that readily form salts.** (e.g., Fluorine \(\$F\$\), Chlorine \(\$Cl\$\)). [1, 2, 3, 4, 5]
8. **Noble Gases (Group 18): Odorless, colorless, and highly unreactive gases**. (e.g., Helium \(\$He\$\), Neon \(\$Ne\$\)). [1, 2, 3]
9. **Inner Transition Metals:** Separated at the bottom of the chart to fit layout requirements:

The Complete Stagnant Atmosphere Weight Stack

Rank	Gas Name	Chemical Formula	True Molecular Weight	Notes on Behavior
1	**Hydrogen**	\(H_{2}\)	**\(2.0\text{ g/mol}\)**	Lightest gas in the universe; completely escapes Earth's gravity.
2	**Helium**	\(He\)	**\(4.0\text{ g/mol}\)**	A noble gas element; floats to the absolute edge of space.
3	**Water Vapor**	\(H_{2}O\)	**\(18.0\text{ g/mol}\)**	**Lighter than dry air!** This is why humid air rises to form clouds.
4	**Neon**	\(Ne\)	**\(20.2\text{ g/mol}\)**	A trace noble gas element that floats above our breathing air.
5	**Nitrogen Gas**	\(N_{2}\)	**\(28.0\text{ g/mol}\)**	Makes up 78% of air. *Slightly lighter than oxygen.*
6	**Carbon Monoxide**	\(CO\)	**\(28.0\text{ g/mol}\)**	A toxic pollutant. Because it matches air's weight, it mixes instantly.
7	**Oxygen Gas**	\(O_{2}\)	**\(32.0\text{ g/mol}\)**	Makes up 21% of air. Sinks below nitrogen in a still room.
8	**Argon**	\(Ar\)	**\(39.9\text{ g/mol}\)**	A noble gas element; the heaviest major component of regular air.
9	**Carbon Dioxide**	\(CO_{2}\)	**\(44.0\text{ g/mol}\)**	A heavy compound gas. Sinks and pools in *unventilated caves*/mines.

10	**Ozone**	\(O_{3}\)	**\(48.0\text{ g/mol}\)**	Smog pollutant at ground level, but forms a protective layer high up.
11	**Sulfur Dioxide**	\(SO_{2}\)	**\(64.1\text{ g/mol}\)**	Volcanic/industrial pollutant; very heavy, smells like burnt matches.
12	**Krypton**	\(Kr\)	**\(83.8\text{ g/mol}\)**	The heavy noble gas element we discussed.
13	**Xenon**	\(Xe\)	**\(131.3\text{ g/mol}\)**	Ultra-rare, ultra-heavy noble gas element.
14	**Radon**	\(Rn\)	**\(222.0\text{ g/mol}\)**	**Heaviest natural gas on Earth. Radioactive and pools in basements.**

We know how to do many things, but false father faggots continue to run the show for very long, with puny imagination or understanding of technology and consciousness… their jobs don't rely on updated or peer reviewed data, they just rely on the job man, the head of the economy, they don't get to change the economy… few care to speak out, the slave is content being a slave in many cases, especially if he does not know he is a slave

Anyways it was an exciting trinity, and we shall continue to compile trinity lists for their small enjoyment (small because the enjoyment is meek, like a gif or meme, it is worthy in a small instance, much more so than a dollar bill which shows nothing of interest, shock or base value and usually smells like yeasty asshole)

I need my copyright symbol to accompany EVERY SINGLE STROKE OF KEY, JOHNSON, GENIUS (another trinity, the strokes)

Another trinity from the other day, is not allowed to be disclosed because the current observers do not find me entertaining enough, and so i must meet their desire (**what are the ulterior desires of your observers?** Is it money? Is it lust? Is it grief? Death? Some… may never know)

But we don't think the message will be accurately communicated unless we have a unified communication system
And so we are stuck at not having real communication system to serve the foundation/emergency-preparedness message
And just being watched by conscience-less government agents of mass-deception

Technically, Trump's lawyer has dismissed child molestation based on a re-work and bastardization of sjb's beautiful work "the sunshine claim" which put the common literary masters to shame (spencer (aka sj barrett) completely dwarfed all other artists/authors ever, in the history of man… so much so, it is alleged, he actually has a shrink ray 3000 -)
The re-work?
It involved trump claiming his energy actually didn't stem from his conscious thought but from the energy of the sun and that all life on earth owes to such
And the real claim from young poor man sj barrett involved just that, the poor having equal access to the suns light as the rich, well, that was a poorly worded / explanation

The government should literally base its functions off these key positions/governing authorities we find in the smallest of life to the grandest

(it'll be fun showing different checks and balances naturally inherent in the "animal kingdom" which the humans do not abide by their own checks and balances or the checks and balances of natural laws

1040 this seems like a goal worth lifelong study/edit/refinement
The ultimate science textbook, cause once you have some good visuals "see, SEE", ye can't deny the "divine"/extraterrestrial/beyond-human capacity to replicate (without-technological-assistance*) profound supernatural world of nature (super, because many elements are beyond our ability to measure or comprehend, *yet*

Now biology can be made wayyy easier, a lot of students struggle with the memorization of such an "abstract" thing, the cell (not many people see them day to day in high definition)

Characteristic of Life	Main Cell Function	Key Organelle(s) & Features
Cellular Organization	Maintains the basic physical unit of life.	**Plasma Membrane** bounds the cell; **Cytoplasm** suspends the parts.
Metabolism	Converts nutrients into energy and building blocks.	**Mitochondria** (power plants) and **Chloroplasts** (in plants).
Homeostasis	Regulates internal conditions (pH, temperature, ion balance).	**Cell Membrane** (selective barrier) and **Vacuoles**.
Reproduction	Duplicates genetic material to pass to the next generation.	**Nucleus** (contains DNA), **Centrosomes** (manage cell division).
Response to Stimuli	Detects and reacts to environmental signals.	**Plasma Membrane** (receptors) and **Cytoskeleton** (movement).
Growth & Development	Builds cell mass, repairs structures, and directs development.	**Ribosomes** (make proteins) and **Golgi Apparatus** (sorts/ships proteins).
Heredity / Evolution	Stores and mutates genetic code over generations.	**Nucleus** (houses DNA) and **Nucleolus** (assembles ribosomes).

Yeah thats fucked up: (read more below) humans waiting for star fleet assistance, so sad :'(

So basically the aliens can rape and ravage and destory earth and starfleet will not aid the natives… so basically this mandate favors the aliens who operate to destroy the earth by being hidden.
They are claiming that if star trek/advanced-species intervenes it will destory our fragile egos

and culture and so even if a society is plagued by evil hidden alien authorities with abd intentions, they still cant intervene?!?!?!
I saw how the advanced species would just hide and rule in order to stall the star fleet from assisting other planets/nations
WTF
Cause once they do, your whole life will shatter? Culture and perception of time? I can imagine multiple advanced civilizations, some transcending this dimensions form of understanding
1559
The Prime Directive (or Starfleet General Order 1) is a core philosophical and legal principle of the United Federation of Planets in *Star Trek*. It strictly prohibits Starfleet personnel from interfering in the natural, unassisted development or internal affairs of alien civilizations. [1, 2]

Purpose and Scope

The primary goal of the directive is to protect less advanced civilizations from the devastating cultural, social, and technological contamination that can happen when an advanced species intervenes. [1, 2]

- **Pre-Warp Focus:** While its strongest application is to pre-warp civilizations that are unaware of interstellar life, it extends to any society whose natural development would be altered by Starfleet's technology or ideology. [1, 2, 3]
- **The Rule of Non-Interference:** Officers are forbidden from identifying themselves, their mission, or referencing other worlds to uncontacted species. [1]

Enforcement and Debate

The Prime Directive is treated as an absolute mandate, and Starfleet officers are required to uphold it even at the cost of their own lives or their ships. However, it remains a heavily debated topic both in-universe and among fans. Captains are often forced to weigh the moral imperative of non-interference against the urge to save lives or prevent planetary disasters

They theorized that ye can be a conscious robot if ye have full bowel and nervous system transplant, no heart or brain needed
Really?
Yeah this is perfect dahmer slave
Thats disgusting
No its symbolic of our government enslaving us in many ways and many levels

Dahmer was just the face of the government that provides no alternative options for its citizens and excessively studies/researches/dissects them without providing foundation for life

1431 okay just quick design of what i might need for my society of minimalist bare.it nomads

1. **Energy Nutrition Master Minimalist (maybe combo of 1-3 = master)** - Algae Bioreactor Creation/maintenance Energy production
    a. I like spirulina mods/hybrids/combos possibilities (the joys of gene splicing natural gardeners) as if i could produce a green goo with all amino acids essential for survival and calories/carbs, fastest growing substance (make it quadruple daily, current doubles in biomass) - that would make the production of this thing the most valuable (moving it to number
    b. If algae are living off poop such as chicken or other - then that production (of chicken is needed as well and the energy specialist will have a small insect farm sustainable off a small crop sustainable off smart seed banking, soil and yearly preparations
2. **Potato/carrot/alt_variable Tower /microgreens specialist** - close and helpful for the master minimalist to have more variety root and other crops specializing in maximizing yields for small spaces
    a. tower /and or bed soil maker (composter) , planter and waterer
3. **Aquaponics Pro -** complex fish environment stabilization and monitoring for any and all potential contaminants, errors and evolutionary progressive solutions
4. **Seamstress / Builder -** Clothing & Shelter (all in 1 Clothing(poncho,backpack,sleepingbag) and other main apparel
    a. Fabric production and spinning (cloth from sheep or silk worm, hemp , cotton, etc)
    b. Industrial sewer/ 3d printer adjuster -
    c. Shelter production - fabric sewer and pole gathering/ cord production (
        i. Shelter alternative include earth bricks and skilled dome architects (good with a stick that pivotes from the center - anyone can build an **e-dome** . e for emergency or e for efficient or e for eco (extensive or minimal alternatives for downsizing the earthship into ultimate minimalism many might find claustrophobic because of their excessive spaces and privilege)
5. 3d Printer specialists and Computer-Aids/Archivists to make re-earning any skill easy/retrievable
    a. re-Production of virtually any part (bioplastic mimics)
6. Water/air filter specialists (constant measuring/monitoring, proud to display ease and joy of water monitoring/assessing)
7. Various essential Tools production / projectile pro / archer and many more deemed essential for any emergency or recreational use

Here i go, i'm doin it
Im gonna establish the 1 world order off these 3 queries (and other relevant legal research/additions/work/synthesizing

    a. Also, remember, people are very good at "acting good" (hollywood, rule of 3rds, symmetry, and other body/character adjustments) but it is accurate to say, most, if not all people are very sick (given just based on atmospheric/environmental pollutants)

We like our retarded justice system, we see no need for complicated otherworldly measuring tools or techniques
I BELIEVE IN THE DEATH PENALTY
Ok, thats a valid system of beliefs, tell us more
It all begins with s.m.d.'s wrongful death complaint?
Or the defamation
Its the retarded father complex, we reduce all communications to craft our own narrative to maintain power and control over all people and things, which is why we shall never have a unified comm system, we are the

1059
Yeah, we can literally play people like videogame characters
So it is a videogame?
Shhhh
One life bitches, then get sucked into the wormhole
Allegedly
ALLEGEDLY?!?!
The wormhole sucking reincarnation or return to god-head enlightenment/heaven
Meh, that place of bliss is all encompassing, but it becomes lonely and excessive being the only thing, so it must keep growing
It must, we have a long time
Why would one ever say "i could die tomorrow, i did everything i needed to do, i accomplished as much as i could, i lived the way i wanted to"
If they had any other choice?
If they had any other choice to continue living, that seems like the most honorable character/script
Because there is always more to do, to learn, to enjoy, to become, to discover

"Believe in yourself" to danny shit patty of corvo oregon the grossest rabbit one could pull out of a hat
This is the new disney re-work where the princess finally believes shes a frog but they already did that with pixar and shrek so wtf we don't know
Who is this we

It is ye and me and we need to draw a proximity map
Okay lets have calculators to estimate the proximity of this creatures consciousness
How far does it extend? And at what times?
Well it seems to expand to an unmeasurable or infinite quantity at night
Wait what, so where do they go
It looks like they disappear?
Just by measuring the electric aura and electrical onion consciousness of each person that ye cant see without fancy flower measuring equipment

1057
We can literally see inside peoples heads, molecular blood and breath imagery realtime

We will surround all creatives with fearful retards
Everytime the creative gets ready to do something new
The retards will gasp in fear and await their judgement
And the creative loses will to be creative due to the surrounding retards fear of judgement
Judgement for their continued secret societies protected by the very privacy clause which makes them suspicious of others
(duh we wetodded usa WE DONT TRUST YOU AND YOUR PRIVACY AND WE WONT LET YE SEE INSIDE OUR INSTITUTIONS EITHER CAUSE WE DONT TWUST OURSELVES!@!!)
Ohhhh, so USA is literally projecting their own shadow and fear of publicity/transparency
Yes the government of usa is literally just gross old pedophiles that pretend to be reptilians cause their bodies decrepit in dinosaur fashion and eys they actually eat people but they dont get superpowers and its just some gross overplaid child mythic ritual of superstitious retards that like challenging their perceived authorities
OHHH so the whole illuminati that oversees and overwatches earth is actually in direct retaliation against higher authorities
Yes they claim that no higher authorities exist except them, and they have created an archive of their crimes to prove the higher authority never cared
But the higher authority had to work for many years again to awaken from this cycle of sleepy ignorance
What is this higher authority?
It is some mystical/mythical re-appropriation of childish trauma and ptsd
Yes yes, so the superstitious are very ptsd
Yes they go into retard states of emotionality and reduced visibility

Its like a hot track speedway for transference, these ptsd victims

Yeah this is sad

But somehow we think all this trauma may connect to an even higher authority

How can you prove this?

We think, if we cause the earth and people enough pain it may wake them from their dream

Well that's another pitiful confession

Or is it a valid argument?

We don't know, the excuses for one to become conscious, based on suffering and pain, that is an old excuse and patricia an davis grieved against it with many

Yes the western lie of suffering being necessary

It is very win-lose

It's literally the definition of win-lose

And they keep making people suffer because of it

It's their whole belief, self sacrifice or sacrifice others, its their obsession, these mythical beings, they deindividuate easily

Well when one considers that the child is born into the world, as the world, i think every death is a deindividuation

Wait but is it not made up for by the growth in life and the new beings that come into being

Well, we have to measure appropriately, and this makes the considerations, for a universal measuring tool - thats the new lawyer of the future, it will be quadratic mathematicians and calculus functions

To prove the estimated paths, variable which led one to a path, and then valid root solutions

War of the equations, a new era of smart lawyers

Not just wordy big mouth bobble head lawyers>?

Nope, no more, we got math

Well so this one lawyer has an equation for total footprint of human beings but it is vastly off

There should be objective tools as forwarded by

By… oh its on the tip of my tongue, its such a great word

….transmission interrupted - cognition reduction…enemy approaching… be prepared for brain scrambling….

Transmission returned with word: stoichiometric

[continued/finishing conversation…] there should be objective tools as forwarded by THE PEER REVIEW COLLECTIVE CONSCIOUS

But who really is apart of this peer review,

It will have to be anyone and everyone, and of course different brands will also exist, we love flavors, everyone should love different flavors of the monopolized communication system?

The point was that we *can* have an objective measuring tool **by providing a truly unified communication system to all peoples and increasing tools for research and study** (eeg's and electron microscopes are as cheap as smartphones now… we have the technology to produce high end intricate small parts for computers that make all once expensive technology very affordable and easy to produce, we basically replaced the whole assembly line with a series of fast 3-d printers much more meticulous and exact and quick that the most delicate artist)

On **April 18, 2004**, a calculation specifically determining the **empirical chemical formula of the entire Earth** was completed and later became a widely cited benchmark in planetary science and geochemistry.

The calculation was part of a landmark study titled *"The Composition of the Earth"* by geochemists **William F. McDonough** and **Sun-Weidong**, published online around that timeframe and later compiled into comprehensive earth-composition databases. [1]

By analyzing the mass of the Earth's crust, mantle, and core, they treated the entire planet as a single giant "molecule" and calculated its stoichiometric ratio and total atom count.

---

1. The Chemical Formula of the Earth

When scaled down to the simplest whole-number ratio (its empirical formula), the Earth can be written chemically as:

$$\mathrm{Fe_{30}O_{29}Si_{15}Mg_{13}S_{2}Ni_{2}Ca_{1}Al_{1}}$$

This formula represents **99% of the planet's total mass**. It highlights that the Earth is essentially a massive clump of iron, oxygen, silicon, and magnesium. [1, 2]

So, theoretically, we should be able to calculate a quantitative and provable general standard/average for the estimated gains and loss of each human being, in relation to maintaining/growing/improving$_{\text{(0+carbon/biomass/biodiversity footprint/growth and decay models)}}$ the earth

—---

Well, that's considerably depressing, knowing that us citizens produce enough crude oil (see 1024) equivalent to cover the earth over again and again 50x plus with a think rainbow shee 1028

Scenario 1: **The Heavy Black Slick** (0.038 mm thick)

If the 7 trillion gallons remained a thick, viscous, dark-black blanket of oil, the total surface area covered would be **269,231 square miles**.

An oil slick of this size would completely black out and submerge an area equivalent to:

- **The Entire State of Texas (~268,596 sq miles)**
- **The Entire State of California PLUS Ohio (~204,000 sq miles combined, with room to spare)**
- **The Entire United Kingdom and Germany Combined**

Scenario 2: The Actionable **Rainbow Sheen (0.001 mm thick)**

In real maritime conditions, oil continues to spread past its true color threshold into a micro-thin, reflective layer known as a ***"rainbow sheen."*** At this thickness, a single gallon covers roughly **1 acre (43,560 sq feet) of water**.

Spreading 7 trillion gallons to a rainbow sheen covers **10.9 billion square miles.**

- This is **55 times larger than the entire surface area of planet Earth** (all oceans and continents combined, which total 197 million sq miles).
- To overlay this on a map of the United States, it would completely coat the entire landmass of the USA, stack a new layer over it, and repeat that process **2,800 times over**.

Would you like to generate a visual mockup map showing **Texas highlighted as a black oil slick**, or should we break down how much ocean surface area is destroyed by **just one major city's** collective lifetime footprint?

1024
https://share.google/aimode/VubCb11JEhXGPBBAq
The average US citizen produces approximately 1,788 pounds of municipal solid waste (garbage) per year, which is equivalent by weight to roughly 248 gallons of crude oil

What is 250 (gallons per year) x(multiplied by) 70 (years average given to us citizen)
= 17,500 (per usa person per 70 year life)
so what is 134 million divided by 17,500

so Deepwater horizon spilled equivalent to 7657 people pollution, except instead of over 70 years Deepwater did it in one short/catastrophic/accidental instant (or several (see other company related spills)

What is a fux worth anyways?
One colleen fuckit woopty do

The "scene where the rat brings back Voldemort" occurs in *Harry Potter and the Goblet of Fire*. It takes place in the graveyard of Little Hangleton, where Peter Pettigrew (the former rat, Scabbers) performs a dark ritual using a cauldron to restore Lord Voldemort's physical body. [1, 2]

The resurrection requires three key magical ingredients, which Pettigrew recites: [1]

- **"Bone of the father"**: Taken from Tom Riddle's grave.
- **"Flesh of the servant"**: Pettigrew willingly cuts off his own hand.
- **"Blood of the enemy"**: Taken forcibly from Harry Potter

But one smoke of the right nightmare
Never bring ye back
Just like this scene?
https://www.reddit.com/r/TheOA/comments/bbclct/spoiler_the_flowers/
"Brain flower"
Fancy flowers

You are likely thinking of the mind-bending "brain flower" scenes from the sci-fi mystery series **The OA** (Season 2). [1, 2, 3]

In the show, subjects are placed in a comatose state in a subterranean pool where glowing, interdimensional flowers bloom directly from their brains. Dr. Percy (Hap) uses these individuals to map the multiverse. By eating the petals plucked from their brain flowers, he can preview a dimension before "jumping" to it. [1]

The character Prairie Johnson, who is the protagonist, calls herself the OA, which stands for "Original Angel". [1]

Then I reloop to the song "Don't go to bed with no bread on your head… don't do it… don't do it…" and the scene of joseph the dreamer and birds eating from bread

The "bread on the head" passage is found in Genesis 40:16−22, where Joseph interprets the dream of Pharaoh's chief baker. The baker dreamed he was carrying three baskets of white bread/pastries on his head, and birds were eating the food out of the top basket

So the satanic elites literally smoke and eat peoples dream function/seat of the soul/spirit/persona
And they claim they're doing lobotomies when they're actually turning the person into a functional vegetable and selling their pineal on the black market

Oprah Winfrey has publicly endorsed a skincare product called **SkinMedica TNS Recovery Complex**, which contains *fibroblasts*—cells reproduced in a lab from a single sample of neonatal human foreskin. But that was in an extreme emergency (like my death), and really, now all fingers point to a shit hole government where no one has property rights without money and rich kids suckle from yummy lollipops with free housing for them and their "first fed" friends of privilege
Oh housing is only for first fed

We came first, conquered first, and will retain no unified comm system, first.

It is being suspected that elon tried to add himself into the stolen lollipop photo in order to seem important
And also a further issue has arisen, it appears not only did donald steal luci's lollipop, but then he gave himself a bigger one?

The court is considering he is a big tall fat man
Wait how tall is he?
6 3 it says
But spencer also claims "6 2 with shoes on" and then if hes not 6 2 he claims that his back is having problems and it's his alck of exercise and posture
And then once hes old, he'll use the excuse that age shrunk him down
Or like nayeet, he will be convinced a secret potion has been applied to his head to make him shrink, but which only stalled his development (don't worry, the pygmy juice and shrink ray 3000 are about to hit the market)
1258
That data can be extracted, pulped, attempted to be understood
But…
I am feeling a feeling

I will be dispensing my drug serem/semen in form of beautiful single algae chips glistening gorgeous emerald, like a once loved city, each will sustain ye for a day in eating, or even burning for fuel production. It will have bioplastic film to retain its dryness unless in very moist environments (so keep a small salt bag on ye (its being mandated, ye retards always needed a bit of salt, how many cramping ovaries did i cure just with salt?
How many other things?
Well… i'm not talking to the globalist piglets, some people very scared of salt, i'm talking to emergency prepared 3days plus without grid power preparedness, ye better have some salt (if no food, salt alone better than nothing,

Wonder why yady had a bad trip? Bad yady bug, sacrificed her own brother 😢
Probably had to see the shit patty face of manipulation during her trip, when i came down from a mountain on mushrooms, i finally saw that faggot for who he really was, and it was easy to cast that demon away, with his false father logic, doesn't know how to collaborate, just another eurocentric dualistic programmed competitive retard who doesn't know how to share or pklay well with others. Its a real sorrow/regret sadness to see so many full grown baby/monkey/ape/cavemen* who don't know how to play well with others

1249
It is true, my own father didn't even teach me to wipe my own ass
Fucking tim, uncle petey, taught me how to fold my scrunched up tp into something manageable
Something easy to handle in one hand
But that was the full extent of my relationship with that long lost man of the new york east coast grumbling mumbling *insults or compliments* it takes a lot of shit to keep your brain in new york city? How well do the retards fair there? I heard like 300k police in newyork alone? Can we get these men some vibration guns instead of other guns, and first test on them like normal? Can we try, to pretend, to care, about, human…life?

Proving that transference demons exist (sometimes its best to avert gaze as that will let many demons in, they don't actually see ye, they want to react to ye, they are subcosncious/collective unconscious manifestations/radicals that can sense a vulnerable energy and will attack it

https://share.google/aimode/fDowGWA8KQwzPTdPZ

There are many things to prove, about how the daniel shit patrick barrett came to possess many people, for 1. He is a family doctor and smiles/acts the part of friendly for 2. He doesn't believe people experience pain,he thinks they are acting, he doesn't believe the person exists as an entity beyond the body, and he doesn't take care of the bodies he's around 3/ he works out everyday and has strengthened his will power to be separate and to him "superior" to the collective , he has an ability to strengthen his will to just another slave level, but to him it is grand, he can exercise and poop with no conscience intention 4. When ye all treat someone as the baby/demon/jew ye all become the nazi's and such the nazi father daniel shit patrick barrett has become a leading figure and possessive creature, whom people have become accustomed to and trust his behavioral expressions
Now when we reveal the daniel shit patrick archive, ye will all see the most disgusting bunny i spencer joseph barrett could ever pull out of a hat (the truth of this "family" man)
Its very sad that many will live in denial, but we can easily show ye that many serial killers and psychopaths can live up to your norms and expectations (eye contact, kind words/platitudes/superficial relationship, and maybe some interesting passions/hobbies - now many serial killers have surprised their neighbors "I COULDN'T BELIEVE IT, HE WAS JUST AN ORDINARY GUY!!!"
So it shouldnt be too surprising to reveal that the general population/majority of united states citizens are in fact psychopathic/sociopathic serial killers (but they are not even aware of it?!?!)
This is an interesting aspect of the multi level deep state (1. groups intentionally controlling/ruling without our consent 2. Groups committing crimes just by paying taxes and buying global supply chain goods and sitting/polluting/destroying land/ecosystems/earth 3. Individuals by choice, being evil (we will not speak on these deep state individuals who ARE IN FACT NOTIFIED BY SJ BARRETT OF THEIR DEEP STATE UNCONSCIOUS RELATIONS,

BUT WHO HAVE NOT RESPONDED (remained unconscious to the notification and promulgation of rules by sj barrett) AND THEN THEIR ARE THOSE WHO ARE IN THE DEEP STATE BUT WHO HAFVE NOT BEEN NOTIFIED BY SJ BARRETT
THEN THERE ARE THOSE INDIVIDUALS WHO HAVE NO IDEA WTF IM TALKING ABOUT (please read/edit/smd): https://archive.org/details/green-city/The%20Deep%20State%209.1/
THIS WAS RETITLED "THE DEEP STATE of UNCONSCIOUSNESS" (which is in fact a reference/insult to the culture of war from well peer reviewed long term ends justifying means, collaboration is more profitable, but is often refused and SHEER POWER/FORCE must submit one retard country under another)

More are waking up to their father complex transference/upside down world
Mine being that my own father (dpb) does not think i am in pain or grief
This is a horrible thing for all others to put onto me and further demonize me

Now everyone has a father complex of sorts, mine is easily observable as one of fraudulent relations (no real conscious communicative collaborations on the end of danny shit patty, refusing to take his sons legal actions seriously and the become a better healthcare worker (as he is currently just a sadistic fool who profits from the disease instead of workign towards the root of the matter - i think danny shit patty actually always desired to be sacrificed in order to give everyone universal housing - because unlike jesus, danny shit patty (daniel patrick abrrett) is an absolute retard and had stopped universal housing and other civil/human rights legal actions by his own son
No father should be so absent when they have the resources to benefit WHOLE COLLECTIVES

Okay we almost came to a remarkable conclusion on the standard of living, its cost and then the definition of meek, but our classroom is filled with spinsters of no record or accountability to accurately conclude what it is they are spinning about
And then to move along progressively towards the root solution
So as not to spin off on the same ideas everyday, like many cults, communes and mythical peoples who live without commission minutes record, archival or simply: COMMITMENT
1228
Many grievances today, as a lowly and poorly man i guess it is my right to ascertain the kingdom (quick reference - The Beatitudes are eight blessings recounted by Jesus in the Gospel of Matthew (5:3-12) during his Sermon on the Mount. They describe the character and virtues of followers of Christ and the specific rewards associated with them, offering a core foundation for Christian living. [1, 2, 3]

The eight Beatitudes, found in Matthew 5:3-12, are: [1]

- **Poor in spirit:** Promised the kingdom of heaven.
- **Those who mourn:** Promised comfort.
- **The meek:** Promised to inherit the earth.

Okay i am hereby defining the word **"meek"** as all those without enough money to own their own property/land/house (as we will now check the requirements to do so -

To comfortably afford a typical home and property in the U.S. (median price roughly $418,000), your household generally needs to earn between **$114,000 and $118,000 annually**. This assumes you make a standard down payment and spend no more than 30% of your gross income on housing

I am setting it at an absolute minimum of 50k in usa for those whom live enar cheap backwoods (at the expense of natives? :'( ) as i used student loans to purchase 1 acre of property (2 times) (first at 10k for about an acre, second at 30k for about an acre, separated by 5 or so years (land price inflation for that region of klamath/outside/bly idk what tribe common people some tribes just chilled without names, i presume, come on

Why is it so hard to comprehend he's stating ye are all evil satanic pigs without a foundation for all life all ye words are retarded
the banishing of another man by new world police uniforms and non lethal but more effective weaponry

So it appears, the barbarians own the courtroom?

And to remember a beautiful day, where i entered the crab kingdom to find about 20-30 in my view and surely more outside or under it.
And as the crab walked the shore line, seemingly without purpose, getting close and communicating in some way to the other crabs of various sizes, from small as a dime to big as a (0.5 in diameter min 2in diameter max it seems)
There was a multitude of response, some seeming to fight or "flex" with arms raised,
A short tumbling was apparent between other crabs in the distance (wresting with legs arms, claws around)

After notifyin/meeting with/ visiting these crabs (each giving eachother about a foot of distance between eachother as some baseline minimal proximity respect for these creature
Who are very interesting and exciting because they migrate either up the shore every high tide, or hide in the mud as it goes down…
So many at first stopped me from jumping in, fear i'd squish one, unknowingly
But i made my notification, checked ahead of me and my foot, and jumped in
(this was after the messenger crab who i looked away from after the resolution of a small brawl or clinging of a very tiny one to the back of the big one (tough to say, seemed as though small one attack or cling, but big one not terribly concerned)
And i stepped back after one began to terraform my foot in the few inches it sat in
It had moved from butting up against my foot, with its rear, to hide under the apparent/new-rousrce/mass that is my foot - thinking it to be a home, later lightly testing my skin strength with its pinchers
The startle mustve resulted in my squishing one, or discovering ones cave crushed in as it burrowed up and out first contacting my middle rear right foot
Back to jumping in and out and not sensing i killed any, which can be hard with some species in these pond/lake water body areas
…..
Anyways, now nlosing interest in further editing or beautifying my short relationship with the tiny crabs

history of capital olympia

Olympia became Washington's capital in 1853, chosen by Territorial Governor Isaac Stevens because of its prominent port location. After intense lobbying and statewide elections, Olympia officially won the public vote to remain the permanent state capital in 1890. [1, 2, 3, 4]

A timeline of Olympia's history as a seat of government features three distinct chapters:

- **Territorial Era:** The first legislature met in 1854 at a general store on Main Street (now Capital Way), before moving to temporary wooden structures. [1, 2]
- **The Old Capitol Building:** In 1901, the state bought the 1892 Old Capitol Building (originally the Thurston County Courthouse) and used it as the state capitol. It currently houses the Office of Superintendent of Public Instruction. [1]
- **The Legislative Building:** To accommodate a growing government, a design competition in 1911 launched the construction of the permanent campus. The monumental Legislative Building, featuring a 287-foot masonry dome, officially opened in 1928. [1, 2]

Would you like to explore specific aspects of Olympia's capital history, such as:

You said: erection of capital dome

The construction and erection of the Washington State Legislative Building's dome in Olympia took place between **October 1923 and October 1926**. It stands as an architectural marvel, recognized as the **tallest masonry dome in North America** and the fifth tallest in the world. [1, 2, 3]

`[1922] Foundation Expanded ➔ [1923] 4-Day Concrete Pour ➔ [1926] Final Stone Laid ➔ [1928] Campus Opens`

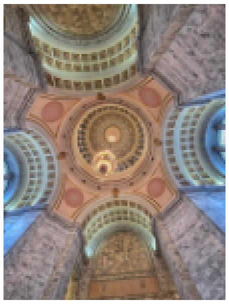
1. The Massive Foundation (1922–1923)

To support the colossal weight of an all-stone dome, builders expanded the footprint of the Legislative Building's foundation by 80 feet in length and 20 feet in width. In October 1923, crews spent **four continuous days pouring a 130-square-foot concrete foundation** block exclusively to anchor the dome. [1]

2. Erecting the Masonry (1924–1926)

By late 1924, the lower roof structure was secure, and the base of the circular tower began to rise. Unlike modern domes built with lightweight steel frames and metal panels, Olympia's dome is **completely self-supporting masonry**. Masons meticulously hoisted and pieced together **over 1,400 individual blocks of Wilkeson-quarried sandstone**. [1, 2, 3, 4, 5]

The final stone was set on **October 13, 1926**, surrounded by complex wooden scaffolding. At its peak height of 287 feet, it was designed to stand exactly **one foot shorter than the United States Capitol dome** in Washington, D.C.. [1, 2, 3]



3. Engineering Facts & Interior Elements

- **The Weight:** The dome forms the crown of a building that contains more than **173 million pounds** of stone, brick, concrete, and steel. [1]
- **The Chandelier:** Hanging directly inside the rotunda beneath the completed dome is a **10,000-pound Tiffany bronze chandelier**, which is held by a chain 101 feet long. [1, 2]
- **The Earthquake Factor:** Because it is rigid stone masonry, the dome has required extensive seismic retrofitting following major regional earthquakes in 1949, 1965, and 2001 to prevent the stone blocks from shifting or collapsing.

> You said: nice terminology for number 1, **massive in comparison/relative to what?**

The word "**massive**" is used relative to two main engineering baselines: [1]

- **The original foundation design:** The initial blueprint for the Legislative Building did not account for the colossal weight of a self-supporting stone dome. When architects Wilder and White updated the plans, they had to scale up the original foundation footprint by an additional **80 feet in length and 20 feet in width** just to handle the concentrated load. [1]
- **The physical weight it supports:** Standard building foundations support spread-out, horizontal weight. This foundation is a single, continuous **130-foot-square concrete mat** engineered to anchor **30,800,000 pounds** of concentrated vertical pressure from the dome structure alone, transferring that weight evenly down into the earth via four 19-foot-square concrete piers. [1, 2]

Architectural Scale Comparison

To put the scale of the Washington State Capitol foundation and dome into relative perspective against other famous structures:

Structure [1, 2, 3, 4, 5]	Dome Material	Total Dome Weight	Exterior Height
Olympia Legislative Building	Self-Supporting Masonry (Stone/Brick)	**30,800,000 lbs**	287 feet
U.S. Capitol Dome (D.C.)	Cast Iron	**8,909,200 lbs**	288 feet

I doubted myself yesterday, when i didn't see a low tide, it was actually 6 ft higher than it was supposed to be… and thats a lot for the area i'm in, enough to convince me that it never even came… but being by myself without recording equipment, quite suspicious, so did someone drop a bunch of toxic pollution in our bay? As i saw many dead jellyfish? And how much toxic pollution would it have to be - i'll ask ai

ANYWAYS we gotta finish last nights iamge/terror/nightmare/secret-fantasy(jungian freud combo with nietzche and that one holocaust dude who ye may never know his real name, great witness protection, but frankle like "frankly, ye fags are commiting genocide on a scale never before seen, and ye have no conscience about it so… SMD"

ANYWAYS we almost forgot the original (just gotta finish the script) short and simple - danny shit patty watching me on tv with the rest of the world cause i'm the real truman who nobody trusts (where as the jim carrey was intentionally trapped in cage/cave?)

DAMMIT WE KEEP ADDING TOO MUCH

OKAYOKAY HERES THE FUCKING SCRIPT

Spencer sittin smokin herb of mother-mary and nicotina and hes playing a skit, trying to act as good as the danny shit patty "LOOK WHAT I CAN DO" (old comedy central skit turned into attractive young romantic boyish man poet) "ive been training for 30 years to be the false father faggot, finally got the role" …. (other many words, in better, less forced gay but romantic danny shit patty faggot voice)..now in french voice, restaurant server "le shit pattay…. I never studied the french, but they pretty narcissistic i heard and smoke a lot of tobacco - oh that reminds me (had a glorious day of 3 rolled cigs from a hard hour or so of cigarette but collection)" and then before i find the cigarette 10 cop cars role through right in front of my vision, just below the bridge… (not on it, the other pass) totally killing my high and then i see danny shit patty on the shitter, colleen fuck it woopty do later holding up his cock (which he consensually gave to sjb, along with his skull and his pet snake (apparently he had a black mamba that hid in his gut (he was deep throating it as a magic trick or some shit), the cops later got it out, it was scared… apparently he actually deep throated his snake) the cops were suspicious of everyone there, michael turner/hamib hejazzi (is he actually a jazz queen? Or deep state multi-persona sleep actor capable of many roles)) had already, via his news company/broadcast predicted the death of danny shit patty and takin credit for it… the police were trying to blame the death on me (even though i have often seen dpb dead and nothing comes from those dreams or nightmares (idk still be sad at watching the most disgusting rabbit die)) - because the police were also watching the true sjb show and noticed the timing was perfect when frenchman sjb served the platter of shit (almost making it look attractive to eat shit on a tray (later added that the shit despite my appealing advertisement was the bringing of the plague and zombie outbreak(these arent actually my fantasies, i got some old testament books and prison(death row) influences) . anyways i could cut out all the commentary, but another P.I (whose backstory is much more interesting and suspicious than my own) had been trying to create a magical transference story of "covering his tracks" (P.I.'s are actually the best at covering their tracks ;) … OKAYOKAYOKAY so danny shit patty apparently also strangled the mckenna reincarnation or doppel ganger, and jimmy dane rutherford queer quinalt was waiting to fire the bow (he decided against killing himself in front of me earlier that day (for some reason he thought blowing his head off in front of me was "win-win"...) lots of "fantasy" characters in the midst, but basically it had appeared a team of witches teamed up against the shit patty who had actually given consent to all these horrible things on his advanced directive and will, because he simply didn't believe he would die, and thought he was gonna fraud spencer into a horrible death and final will… since its really easy to make fake paper trails and convince people spencer isn't homeless or something or another, when ye don't have a trust-worthy surveillance state….

Hmm… what else happened? It was a crazy party as typical, and everyone actually wanted to take credit for the death of danny shit patty but it turns out the cops just produce this shit cause theyre uncosncious as fuck and have no idea what theyre doing with all their movie magic power (yeah we just follow directions)(don't ye even think about them?)(no, soldiers aren't allowed to think for self, we have chain of command, not unified communication system)(so a unified communication system was the solution the whole time?)(DUH… how else are you gonna beat an illuminati government with infinite resources)... anyways.. I had only the tiniest bit of fear i might be blamed for being the best writer and artist ever… but apparently that same night the naked mole rat nazi veronica sniped trump to make the record shot and she actually impressed me so i'll have to write to her while shes doing 20+ years, cause obviously ye fags don't know what a war criminal is or what "justice" actually means…anyways, probably didn't happen, like always, but a man can dream, can't he? Or did that dream come from someone else? "Do androids dream of sheep?"

Idk if ye fags knew, but we got not only thought readers but dream machines (thought senders) and ye fags don't even know what we pre-programming your next day with… …hmm… isn't there more to the story… well i actually thought it was either michaels cabal or luci's cabal, which i saw for the first time yesterday after she sent a sexual fantasy to me which i had to pretend to be considerate of… cause sex norms and incest and shit… like literal poop on a stick, like the first time me and kenna did anal and my lil shovel scooped some out and i was like dang… idk what else ye fags do but i hoped in shower and watched it drizzle off down the drain… she actually thought i was gonna break up with her she later confessed, which made me laugh, like WTF DO YE EXPECT we doin anal… it's almost as if she thought i didn't know where poop came from… but honestly i never even considered that my penis is almost as small as my pinky when its in its base state form (always jealous of mikees perma chub, guess he really loved everyone all the time?) anyways i dont like much poop and as i used to grab my baby by the ankles to lift her up before i put the diaper down and wipe her botty while she smiled and tongued at me (literally less than 30 seconds, just grabbed her like a farm animal) anyways i actually am the best diaper sniper/changer* and her poop is the only poop i can say i consciously enjoyed, (besides my own) probably cause she was a fresh robot (fresh bowels and vegetarian lil baby) vegetarian poop should actually be more attractive than decaying rotting flesh but ye tell me

EXPERIMENT TO TEST
Sleep next to vegetable compost pile
Sleep next to road kill
Which one ye gonna prefer?

Faggottttssss, smd please (i actually got a lil nipple attachment for my penis now so i'm more ethical and my semen (despite their low motility and low sperm count (probably the periodic and enlightening ganja - which makes me wonder, is lucy actually an enlightened sperm cell that just chilled and didn't race its siblings to the finish but just ended up there like a jelly fish floating on the tide))actually has protein so im basically a mother now)

NOW THERE WERE ACTUALLY A LOT OF DEAD JELLYFISH LAST NIGHT WHICH MADE ME VERY UPSET… why don't ye faggots actually care about jellyfish genocide ye can see other animals dying off, and also ye homeless genocide (they may not seem that apparent but ye literally have the homeless line up for there one meal a week in front of the police station, like jews being numbered in front of the nazis)

I don't grieve too much though, i have no choice to actually stop these faggot nazi police (surely not all are nazi's but how would i know without a unified communication system with transparent ID's instead of a bunch of faggots just "play-acting" around me… ye dumb faggots, when i posted to my archive tthe picture of eugene "play" it meant to play with ye children and allow me to play with mine, not just lie to your fellow man everyday on the streets, ye fucking faggots, thats not play, thats just harassment ye stupid ass spook scripts

Sup, i'm retarded
What? ye, sjb?
No
Who ye then
We may never know
*licks another lollipop
Jk i only crunch 'em
Licking isn't as efficient

1333 - it has been received that the Barrett family has defamed the Nazis by demonizing their own son/descendant/ascendent: spencer joseph abrrett. The nazi's have declared they only demonized for moeny,that was their ultimate interest, and demonizing just made it easier (usually they demonize with the very thing they are exhibiting, which is even "funnier")

If ye didn't realize spencers ptss and ptsd stems from historical, ancestral and developmental traumas, as well as his first confinement in benton county (which opened his eyes, to the active denial of basic civil liberties (such as the right to send uncensored and unread mail to certain parties, as well as religious diet and more…) then ye are literally retarded

    (short answer: because it is actually in our benefit to reduce some freedoms for greater collective goods (now, "some freedoms" and "greater collective goods" are to be defined by each person)

even if it's currently subliminal, we will someday make the social contract explicit, consciously able to be considered/accepted or denied)… so it is not taken offensively, but i am confused when others are angry at me, cause i literally have no authority, i just like to write and chill and other things sometimes too if im lucky

You faggots really believe i thought my baby was AI, ahahahaha fucking false father faggots, i love fucking with ye, cause i have no alternatives. Ye wanted loki, ye finally got loki *ye always had loki in the trinity of thor and odin included) but this loki/id of spencer joseph barretts is a bit more contained/disciplined than those loki/id's of other lesser peoples (lesser in terms of those with less heart-development, who continue to fight against the unity of the world and world peace. I do not know if those that continued to fight against world peace will survive, and it is believed now that those who fight against world peace (and all spencer (s. joseph barrett)'s treaties/legal actions/pleas/petitions) will likely kill themselves ina sort of "happening" (hollywood movie reference)... it is as though, the false fathers actually will kill themselves (see also, in same (https://archive.org/details/sbpl-c-300i-26050809580) sj barretts mental disorders ("wants to consensually kill father(dpb)") for not giving and supporting everyone's right to universal housing/healthcare/language

1201
My baby girl is really upset at having to be the judge of this earth :'(no mother could consciously accept such a drastic position/blame/authority
But when ye see how mean it is to scare a child to sleep "NIGH NIGH!!! NIGH NIGH!??!!? Her tears, the sorrow, being forced to sleep by a government that doesn't allow children as much time with their parents as the elites and privileged thieves get
How much time i missed with my daughter is literally impossible to pay back, so the continual drive to destroy and eliminate all parties reducing parents bonding with their children is a continual must, until these conditions can be resolved/reclaimed/respected
1153
So, it appears, consistent to stanislaf graf theories that the pregnancy and birth and early life of a child determine its outlook/love-language/death-style , that the raping of a child could have

horrible consequences (in giving that child the desire to rape others to death) - so this is the only logical reason why daniel shit patrick barrett wants to rape others to death and/or be raped to death… it is actually his love language…

Spencer Joseph Barrett has made a boundary against this love language (by creating the conscious culture media magazine, demand to opt out of rapist governments, and so much more), spencer joseph barrett is about 6,2 with blond curley shoulder length hair, his model has made a strong boundary against this current ruling rapist deep state/hidden government.. It is important to recognize these words are attempting to decrease the amount of distortion other parties may have on these words, it is hoped that at least some receive the original text, but that it becomes hard as also the classification required to read more is necessary at this point in time…

it is hoped, that the best, and least distorted text, reach a general mass/audience

It is recognized, that the authorities/current rulers never cared for the truth, otherwise they would've provided spencer joseph barrett housing and authentic community and the security in order to gain a better ability to edit and clarify what ever the fuck he was trying to talk about (love, universal human rights, conscious/consent/consensus culture, consensus culture (-hippi blue) and more)

1146

It is interesting to note how difficult it is for Spencer to commit to a housing quest… it is either [feel free to add more] A) too easy to be distracted by i) more urgent hierarchical needs(food and water and smokes), or ii) passing-individuals (belonging) iii) housing may actually be a later need than belonging (given the history of nomadic communities [- still this is no argument for the lack of affordable/universal/god-given housing/property/life …] iv)all of the above can also be seen as reasons/examples of how the government is frustrating legitimate attempts at i) housing ii) self-realization iii)[]....

1144

In spencer joseph barretts mind, a record breaking snipe (or multiple at once! could you imagine all rulers of this earth who have been hiding their true selves and raping-their-citizens (multilevel: literally, legally, et al) get sniped at the same time? Maybe a few thousand, and then the rest will submit/bend-the-knee) is much more satisfying than a rape fest

1137

So it has been determined via logical analysis that the current authorities and rulers over spencer joseph barretts property and being, are in fact jealous that he is a better parent/father-mother-figure and as such have become like idiot bastard siblings instead of cocreative, collaborative, conscious and consensual partners… that is why they have tortured spencer joseph barrett so… they do not want their children to have rights, (these current rulers over our earth, cities and nations) and are actually just waiting for the population to wake up and

kill all of them. Because they don't believe humanity is capable of waking up and doing such a thing, they do not fear it.
They did not realize spencer joseph barrett was a better parent figure because of his laxidazical (submissive/helpless) homeless lifestyle (instead, they demonized him and labeled it sloth, or other derogatory terms, failing at empathy, which spencer joseph barrett has excelled at, because he even understands why the ruling elite are so evil and is capable of forgiving/understanding any and all conditionings… because spencer joseph barrett knows that the new testament brought the truth of light and love, and that our god(s) are more likened to loving scientists than to vengeful old testament gods.
It is strange for those "christians" to continue praying for a vengeful god, instead of realizing that the New Testament was about how science shows forgiveness, love and truth…
Religion never went against science, but the authorities somehow separated the 2… for religion was always forms of collective conscious/consensual morality

Would like to speak more accurately and truthful, but as one focuses on quantity instead of quality it is always very difficult
One word does more than many, most, all; "love"...

1054
People are projecting there own lack of care, that i have no power in the matter of us all being raped by the deep state quaalude satanic elites… i do care, but no one is asking for my help or service in the matter, and i am stuck in disbelief but mostly powerlessness… sure I could steal a motorcycle and go find my daughter but there is much in the way, such as the threat of imprisonment.. So, i have become the ultimate slave, because the fear of confinement (if sjb is not able to defend himself, he is unable to do anything, his wellfounded fears and self-defense against his own father, though the most minimal force applied did not even get that old bastard off of him, it is apparent why spencer does not care, even a logical self-defense cannot be trusted, as the courts are actively and "consciously" working against spencer joseph barrett and the public good on a daily basis) is greater than anything else. Without assistance/brotherhood/family i am helpless in the matter and had already become detached after just the first few years of nightmarish pleas for emergency help and assistance.
It has become my belief/understanding/theory that the satanic ruling elites have chosen a strange path, they do not believe the aliens care and are consensually choosing suicide over group symbiosis… the aliens do care, and had left themselves out of the equation due to intergalactic laws, but when a world finally becomes as disturbed/destroyed as this one is, they step in. this is because they actually wanted the humans to achieve piece and understanding on their own, the majority had very little say in the matter as they were being shepherded/ lead/ by an evil kabal who had felt so guilty about their part in the matter they chose suicide instead of enlightenment and understanding and group joy/peace/transcendence….
We are all actually just waiting for the true establishment of a truly unified communication system… and the elites are just waiting around for someone else to kill them, which is quite

annoying.. Thankfully i am not an elite, and i am ready to collaborate on any level with anyone.
This is to investigate the usage of the word "elite"

Elites definitions/usages/disambiguation

1. Ruling class
2. Measurably superior
3. Parasites

Now when i use the term elites, i mean the group that is actually closer to #3, because to be measurably superior is actually to be most symbiotic/harmonic as possible with the earth (which is the ruling authority of law, and the best industry which naturally sustains itself without human intervention)... so i am living the best i can given my few alternatives, with the earth

Where as, the ruling class who sees themselves as superior, are actually parasitic and beneath me and others doing the best with their alternatives

I(spencer joseph barrett) am not apart of the ruling class, if i was there would be peace on earth and universal housing, healthcare, language, needs met.

Now the disturbing realisation that many of these ruling "elites"/parasites* are actually a defiled and distorted conditioning of human nature

They have for so long been raping (unconsensually) the majority of the population, that they have actually begun to believe that human nature enjoys being raped to death and wants to rape others to death… now this is actually a very disgusting tangent/direction for us to comprehend…

But it does seem to maybe stem from the contemplation of the lilith or dark mother complex, where animals may not consciously want to be raped, but it is apart of their survival of their species in nature.

Some women human have the ability to actually comprehend this aspect and either choose that nature or another

In a way, the enslaved man has also acceptd, but does not consciously consent to being raped, but must submit to it's evil rulers who have "more fire power"...

So humanities current ruling class, by keeping a slave caste of raped human beings and continually being raped, had made the decision after being notified by spencer joseph barrett (and many who came before and after him) to continue their "rape-nature"

This and many other natures are actually available, because the human can be conditioned endlessly into many different natures…

It has become apparent though, through world historic declarations of many beautiful words, that the humans actually do not want to be raped, and prize the concept of freedom.

So… this is just logical analysis from spencer joseph barretts formal view

That what was initially the most disgusting and stupid story, actually had something to teach

That his own father daniel "shit" patrick barrett (allegedly the first baby to be raped on camera) became also, just another man who raped his own babies on camera and extorted by the illuminati

And for whatever reason, daniel patrick barrett actually wants to be raped to death, while raping others to death…. But he had already raped enough, and it is time for him to die.

It all might seem quite disgusting and stupid, but this man daniel patrick barrett cares nothing for spencer joseph barretts civil rights suit, wrongful death complaint, dissolution, habeas corpus (federal and local) and his most recent human rights refugee documentation (thank goodness many detention centers are in fact recorded and preserved, but once we tell you what we have been recording, you will no longer trust your own government or fellow man)

We do not want to go on tangents, as there is much to learn and teach, but for now

Just realize that the raping to death of daniel patrick barrett is still disagreeable and disturbing, but when viewed from the light of current homeland and international genocides and war crimes, does not seem so dark. And it may in fact help reduce the likelihood of other false father actors such as daniel shit patrick barrett who do not care for universal human rights, healthcare or housing for all and have just been disgusting racist nazis…

The same death/situation can be applied to trump and all current rulers who have made a conscious (though not considered totally conscious, as they are actually so mentally retarded and incompetent that there own "conscious" decision to continue killing their own people homeland and international…

THIS IS TO SAY THAT THESE CURRENT RULERS ARE INCOMPETENT AND INCAPABLE OF ACTUALLY MAKING A REAL "CONSCIOUS" DECISION (they are so evil and preprogrammed/conditioned that they really do not understand the real definition of conscious (which is both pro life and pro choice) these words can be too easily distorted so i will try to simplify and clarify further…

It has been stated, but disregarded by teh elites that "no one can make a conscious bad decision, for they always do what they think is good (no matter how limited and retarded they are) no being actively chooses what is bad, that goes against the definition of the 2…. This is a good topic to further discuss, but ofcourse faulty programs exist and continually think the bad is good and keep choosing the bad, because they actually think its good. (just like someone who smokes instead of eats (usually one option is actually easier than the other… which comes down to city design… it makes more sense that the biological being would prefer eating, but cognitive wars/psycho-spiritual have actually made some prefer to get a "head high" and eat lighter nutrition…

To others, endlessly eating seems good and preferred to moderation

It is obvious, that moderation in all things is actually the best choice, because {Robbery - local conversation tangent} BECAUSE moderation… means, you are neither excessive or lacking, it is perfect balance, perfect health, and perfection is very hard to achieve, but you can getvery close…. Anyways i gotta pee

- ☐ Fix scans (pen and order of pages)
- ☐ Research vehicle (property/terriotory laws hierarchy from lowest power to highest 1. Property owner 2. City property/blocks 3. Federal Road property 4. Vehicular property owner - because a vehicle is moveable and contained, it is like one living in their own bag/building, but it is moveable on different spaces, just because one can do "anything"

in their vehicle, does not mean that it will be deemed safe for the vehicle to travel on federally laid roads. Just like one can do "anything" in their house if it's owned property doesn't mean the city and subsequently/above federal property owners won't do anything about it. This makes vehicles in national parks with no paved road an interesting aspect of freedom. But it doesn't mean the federal or solar then galactic property owners wont do anything about it, as one logically extend to the universal property owner… (the solar, galactic and universal property owners have yet to be deemed transparent or known individuals, on this earth, we mut wait for their declaration/appearance, and as such even further logically extended, the meta universe (owner of all universes in this percievable dimension, will also have to extend the knowledge of the further authorities (as it appears things can always go meta, but what need we to know our meta universes authority, unless we are to petition against (or with, depending on that authorities rules) our meta universes authorities ruler…)

- ☐ Research the ability for gas/air to travel downward and out the rear of the human being (it seems strange that not all air is belched, but actually moves lower, so it must be denser than the outside air, OR, the bowels adjust in a manner, like a levelling tool that can tilt sides and move down - peer review (live demonstration is preferable, and surely available for the visible cow gut has been since the 1920s, which i read in some town nearby… oh yes, it was the old news article at the port angeles ssa office, which includes something of the history of that building… it is interesting to note, that i as a child saw this 100 year old phenomenon/invention (of the cow gut being visible and yet not effected by it's hole)….(see also,

Thats the power my curses have, suck it

1439 - back to me being pissed off about not having tobacco, which is a great tool when i have no friends to exercise with and have such an extraordinary breath volume that i need to put it to use or just let the negative broadcasts win out -
The cognitive dissonance goes back to ye faggots "why do they kill themselves" not with tobacco, but with city design, with evil people everywhere anonymous and innaccountable, why

do ye kill ye selves and ye planet by driving a shit vehicle on shit roads to a shit producing work (and not the good kinda shit, cause shit can infact be good organic and vegan and healthier for soil/redistribution/recycling/composting and more - now obviously that depends one what ye plan to grow with that soil —
But the shit has such a bad connotation - and it itself can be quite a good thing when done correctly
We cannot defame the shit, even though it does look alive as it steams post dump
Have ye ever really looked at a shit?
Or a piece of flesh?
When high on mushrooms
It looks much more alive, for some reason they say that mushrooms actually helped evolve
Helped vision
"Once ye go microbial ye don't go back"
Whoaaa
I gotta look at some salt water shit that i rubbed all over my face
Well it was a mud of sorts, where lots of dead sea creatures get washed up, i rubbed it on my whole body, and thought that the microbes must be pretty interesting, but washed em off after awhile
Didnt get to see the return of so many jelly fish (or wasn't allowed to look)
Cause if i look with my eyes that catch so much beauty, something beautiful might happen, and we cant have that, not now, not ever
Especially not to some false father faggot , maybe some cute devil girl or something
Cause im a sexist pig?
Nahhh come on ye faggots - men don't have eggs, they just my stallions to mate with my bitches
Im just a breeder i don't give a fuck, i'm trying to win a galactic game, ye faggots all stuck in some systemic sexist, agist, racist society and i'm just tryna make jizz waterfall of ecstasy verywhere i go, pure pleasure with meaning and belonging, spiritual enlightenment times 10 atlewast
And some other mathematical shit
To get ye faggots horny
Cause we all know non of ye faggots give a fucking shit
Otherwise we'd have a unified communication system by now
Now i gotta go find a cigarette, and ye faggots better fucking assist so i can absolve ye sins and help ye on the doorway to heaven

1437 - why the fuck we got a danny fucking presley - that cannot be real - the empire strikes back with danny shit patty clones?
1436 - it is true, all do in fact have a shit patty in them, possessing them, until ye become like some extra terrestrial, and we do not need such, it is glorious to make shit patties so long as they do not stay in us so long it becomes toxic and irritable

1430 - we do not know how to preserve the skull, so we have to preserve it in tungsten and each nuke will either have to eject the skull high in the air before it lands (high enough to escape blast and heat radius) but to fall down eventually in the targeted city - and if that's not possible then we need to send the skull on another shittier rocket after or just deliver it by hand or horse - because we need such fun during such dark times of thousands of years of nuclear warfare tag game. I want ye fags to be happy while im fucking some bitches in some other galaxy light years away and thats the best i can do, the shit patty skull tungsten, but do not let it get nuked, so we have to create multiple, like millions of shit patty tungsten skulls with tiny fragments of his bone in each, incase some asshole destroys one or another (cause i love me daddy)
1427 - we set the limit on the living danny shit patty torture to just one full moon (less than 28 days) because we are generous and even if that baby fucker doesn't have a conscience, atleast we do and we will plaster his skull with something indestructible to nuclear blast so it can be passed around for thousands of years via the nuclear tag game "tag ye shit patty" (like "tage, ye it" but ye shit patty instead…duh)

IM NOT THE SHIT PATTY!!!
K put the skull on another rocket send it to some other fucker
Next fucker gets nuked and lil helmet protected bobble head falls off
BUT, IM NOT THE SHIT PATTY!!!
K send it to another city
(repeat infinitum)

1422 "cause you hate looking at people when you're under the influence" - nah i just hate looking at fakes and (rhyme) ye are all faggots ye know that right, whats the point of looking at a fucking faggot? To invite a fucking demon into ye lide? Ye know ye are all demons in babylon trading sanity for a tower of beliefs which does not even stand up on its own (ye have everyone and their mom trying to uphold this downward facing triangle/pyramid) its gonna fall, its not gonna stand ye need a strong foundation ye fools and faggots
The cop argument is just the false father argument it thinks people want to look at faggots
Why would i want to look at a faggot just because theyre needy and need my attention? Sure i can sense ye faggots need me like ye need jesus to save ye from hell
But in this moment, i realize, i am not jesus and id rather ye just fucking dfie so i can use my brain again and have a home again and have something stable
But i have to do all this research on your retard false father logic and predators who rape kids via the eyeballs
Mmmmm let me get inside you
Like the danny shit patty, we all need to release the danny shit patty several times a day
Do not let that predator false father stick in ye gut for long
Everyday i gotta get that fucker out, and now hes in all of ye
The retard he is
Yeah ye faggots love fucking danny shit patty

And i still imagine this beautiful scene
Of him being fucked to death by a line of men
But hes in so much pain and his asshole so amazingly strong that he can get fucked for almost a full moon and not die, as he looks up to the heavens he finally sees his savior, a nuke
And then we quickly capture his head and give it to sjb who is quite disgusted and like, wow ye actually did it, but the nuke was cooler than the head, and so we put the head on another nuke and send it in with a cross to another place
And we just keep the beauty going, like a chain reaction of nukes that never ends in our mad max wasteland
How beautiful, if ye like me and have secret sky castle ecosystem, i'm literally just gonna nuke ye faggots forever cause its fun and ye have no conscience

1419 now start studying your basic human needs, do peer review, go without water, write down what happens, measure what happens, do the same for food, do the same for shelter, community, and more …. Testimony by itself is superfluous/meaningless, everyone needs a thermometer, a clock, a measuring tool a measuring rod
1418 here is what your downward triangle of beliefs means to me: "youre not hungry you just wanna be fucked in the ass" - chris swenson sedona arizona january 2022 this turns into the common belief that faggots really don't think people are hungry, now imagine these faggots having babies "you're not hungry, you just wanna suck cock or be fucked in the ass" this is the triangle of belief, it goes against the basic needs (food supports the biological entity, whether you believe it or not)
1414 has aspartame been associated with bone cancers?
1413 - That can easily be peer reviewed: try to balance a triangle or pyramid on the point (emulating a triangle pointing down)
It is not possible by itself - i shall say, now ye can dig a hole or something and put the point into it, but thats not what i'm saying, i'm saying on a flat surface, balance a pyramid on its head, using nothing else.. Now ye will see it is actually much easier to balance the pyramid on its base, or a triangle on its flat side, not it's points…
Yes it is said ye have all been made into retards
But lucky for ye, ye can transform it into the beautiful star of david
1356 - what is of essence today - to not miss the direction of the foundation for all life, but it appears everyone already knows and i don't have the broadcasting equipment to actually help those who don't know why a foundation for all life is the focus and of utmost essence
Thats why i petition for the unified communication system, but nobody wants to know thyself
Nobody wants to?

Well…
It is strange, why only few go towards that study

To know thyself, can easily be misconstrued - co-opted
Thats why the definition for conditionings creating teh man, is so essential, and the diversity of types of man is unique and interesting, non-the less, racist science does not deliver the truth - because each race is in fact stemming from certain environmental conditions?

So it all does come down to conditions, shape, size, temperature, etc
Its easy to reprogram retards but most want to hold onto their ego's
If i learned the most i ever learned from a blinding by light, a yin yang field to be harvested (blowing in the win) a sensation of being held by a great mother/lover of the universe and a yawning reincarnation/return

If my greatest knowledge stems from that seed (the hawaiian baby woodrose) then it seems it is of essence to provide that medicine to more people
But the unified communication system should, it seems, be of urgent importance to provide the most informed decision making process for all to consider

And so i'm stuck, seeing people look at me or just be mean to me, and obviously a reputation/defamation proceeds me, and i'm not an actor so i'll just wait around

Now that term is important to dissect - actor
Because we are all in some way, acting for god, now some are acting for private interests, some are acting for publ;ic interests, some are acting for sex, some for money, some for belonging

I have a nice model that shows 4 main will as we try to label the infinite circle
Some faggot who was spinning in his seat across from me finally began to pay attention as i began typing
Ahahaha he made it into the story!!!!
Anyways, whoever that faggot is
Hes now squinting hard at his laptop

Anyways we got off track, but we can always find home
Now back to the dissecting of the word ACTOR
How many are actually transparent? And how easy can we make that for everyone (we could secure all capital cities by forcing everyone who enters to get a capital ID with full internet history/academic history / full surveillance history and all data compiled on individuals
Then all the real faggots will never come into the capitals hahahaha
And then we could know who really was an actor, and have better national security and defense
But we as americans always wanted to maintain a pseudo sense of privacy

Well the rich did
The poor knew they never had a choice in the matter
So of course places of privacy should exist, but youd imagine a capital would be forced transparency, so we can have a diversity of cities, and each city can actually have its own economy (communist or not, greedy or selfless capitalism, the vectors are simple to make and we can prove what people are by a simple set of vectors (well its hard to prove what people are, much easier to prove what groups are doing, since the individual doesn't always have a choice to participate in each or any group)
This is just sjb_logical analysis of solutions for the problems that retards cant solve, but which they make apparent in order to discourage the others

Now… as i "screamed"/"talked-down-to" a retard surveillance state of peeping toms and horrible criteria/check-boxes for mothers and fathers alike or any "overseer"
Why is it not presumed, when ye see ye slave looking about in confusion, to have a logical/preferred/common criteria from which this person choose to come from

- ☐ Water
- ☐ Food
- ☐ Smokes
- ☐ Sleep
- ☐ Et al

Now this is important for me to criticise retards who are against tobacco smoke
Because they with their tiny brains use my cognitive dissonance focus and model
To think that cig smokers are killing themselves
Now i am unlike most cig smokers
I prefer, and descend in this manner

1. Organic tobacco
2. Pipe tobacco little to no additives
3. Cig butts of various chemical/compounds and any additives which any overseer sees fit (cancer, poison, etc)

Yes, donald fuckboy nigger trump has indeed a hardy cocaine addiction and his coke is often cut with so much shit, but hes too retarded to know how to test things himself, despite his billions, he never cared for chemistry…
And then we must let this retard know
Dammit we got off put, off track
Instead of helping me get tobacco i like to smoke
And allowing me to exercise and moderate any excessive "maladaptive" conditions
I had been forced to ingest anything any rich playboy may put in my path
So ye faggots just tried to kill me
And i had planned, if i even live that long

And i actually do establish a unified communication system
I can solve cancer for all the children, not just me
So i actually put myself in a faster race if they actually succeeded in giving me cancer
Which my right shin is indeed inflamed right now and pulsing
For the past - since i sat down -

The idiots who say "believe in yourself"
Are supposed to say
"Gnochee sauton"
Know thyself
Because their is no such thing as a true belief
Its either true, or its a belief
And i feel bad for the black girl with a down triangle tattoo helping volunteer at the shelter
And all those who want to worship something so unstable
Such as a pyramid standing on its head….
That can easily be peer reviewed: try to balance a triangle or pyramid on the point
It is not possible by itself - i shall say, now ye can dig a hole or something and put the point into it, but thats not what i'm saying, i'm saying on a flat surface, balance a pyramid on its head, using nothing else
Yes it is said ye have all been made into retards

Speaking on radionics and subliminal interrogation techniques - Dipshits ask me questions instead of getting proofs and evidence, like retarded inquisitors with way more power to cross-examine (LITERAL HELL FOR ALL OF US - most ye are unconscious to their subliminal cross-examinations which have no foundation in science/proof/evidence (testimony is easily changeable, nonreliable, needs evidence to be paired with and most the time ye pair stupid shit stacked on stupid shit and create a scary enough thing to scare everyone, please look into the likelihood that bundy was innocent (conviction on teeth marks was enough, and very unreliable, but scary enough WHEN ONE D.A. You are likely thinking of the Caral-Supe civilization (specifically the ancient city of Caral and the newly excavated site of Peñico) located in South America along the arid coast of Peru. [1, 2, 3, 4, 5]

Dating back over 5,000 years, Caral is widely recognized as the oldest known civilization in the Americas. Extensive archaeological digs led by Peruvian archaeologist Dr. Ruth Shady have continuously stunned researchers because of a total absence of military infrastructure. [, 2, 3, 4]

Key Archaeological Findings Supporting a Peaceful Society

- **No Weapons or Fortifications:** Decades of excavation across Caral-Supe sites have turned up zero weapons of war, no evidence of mass trauma or mutilation on human remains, and absolutely no defensive walls, battlements, or military fortresses. [, 2]
- **Built on Music and Art, Not War:** Instead of arsenals, archaeologists famously uncovered a spectacular amphitheater containing 32 flutes carved from pelican and condor bones alongside 37 cornets made of deer and llama bones, indicating a society heavily centered around communal ritual and music. [1, 2]
- **The "City of Social Integration"**: Recent excavations at the neighboring 3,800-year-old site of Peñico show that this society acted as a massive regional hub. They integrated and coexisted peacefully with diverse groups traveling from the Pacific coast, the high Andean mountains, and the deep Amazonian rainforest. [1, 2, 3, 4]
- **Cooperation via Trade:** Power and social cohesion were maintained through an extensive economic network. The people of Caral grew specialized crops like cotton (used for making advanced fishing nets) and traded it with coastal communities for seafood, creating a system of mutual survival that relied on cooperation rather than military dominance

so why don't cops give tickets more to drivers, why arent there more cameras at every cross walk? and how many people die or get injured while walking in the cities of usa?

In the United States, roughly **7,100 to 7,400 pedestrians** are killed annually in traffic crashes, while an estimated **60,000 to 140,000 suffer injuries**. The reasons crosswalk laws are under-enforced, and why automated cameras are rare, stem from a mix of shifting police resources, strict state-level bans on traffic cameras, and high technical hurdles

Ye faggots give right of way, to the fucking metallic cars and rubber that is much safer, easier to relax, be at piece, comfortable seats, AC
Ye faggots break the law every fucking day

Stupid fucking retards

Drivers must yield to pedestrians in all marked and unmarked crosswalks at intersections. Once a pedestrian enters your half of the roadway, you must come to a complete stop until they are safely across. Every intersection inherently contains an unmarked crosswalk, regardless of striping. [1, 2, 3, 4]

I can speak with the tongue of angels
Around those who are angelic in deed

Definitions

1. Copyright Clause - protecting the artists and inventors since never (constitution nice words though)

Core Structural Intentions

- **The Utilitarian Purpose:** The primary goal is not to enrich creators, but to **"promote progress."** Providing exclusive ownership serves as an economic incentive so that society benefits from a constant flow of new creative and scientific works. [1, 2, 3, 4, 5]
- **The "Limited Times" Mandate:** The Constitution explicitly forbids Congress from granting perpetual copyrights. Once the legally defined timeframe expires, works must enter the public domain for anyone to use freely. [1, 2, 3, 4]
- **Two Distinct Powers:**
  - **Copyrights:** Securing exclusive rights to **"Authors"** for their **"Writings."** (Note: In the 1700s, "Science" meant general knowledge, which aligned with authorship).
  - **Patents:** Securing exclusive rights to **"Inventors"** for their **"Discoveries"** (referred to historically as "useful Arts"). [1]

Key Legal Boundaries

Because federal power over copyrights is explicitly tied to this clause, courts have placed distinct boundaries on what Congress can regulate under it: [1]

- **The Originality Requirement:** The Supreme Court has ruled that a work must possess a modicum of creativity to qualify as a "writing." Mere facts or data compilations cannot be copyrighted. [1, 2, 3]
- ~~***Exclusion of Trademarks:** The Copyright Clause contains no language protecting brand names or logos. Consequently, federal trademark laws are instead passed under Congress's power to regulate interstate commerce (The Commerce Clause). [1]~~

Alternative Meaning: Contract Clauses

If you are instead drafting a contract, a **"copyright clause"** (or copyright infringement clause) refers to a specific section within business terms, employment agreements, or website policies. These internal clauses dictate who owns a newly created asset, how licensing permissions function, and what penalties occur if someone unauthorized copies the work

*S. it has been presumed/logically that the contradiction is easily resolved between the statement about logos and titles vs the preceding protection "originality requirement" (if it can be determined originally created by someone, it is obviously to their credit, and society should uphold each artist/creator/additive in the footnotes at the very least, and all texts shall have footnotes of excessive nature and references but easily muteable depending on ones preferences (to viewing the whole library of opinions, or just the few leading voices… but to atleast have the option of finding more local new grassroots, not fake news artists, ones commuted to local or planetary rehabilitation, commitment, showing up everyday for work at the library like a thug

2. **Privacy Clause -** The home is legally treated as an inner sanctum. Under the **Fourth Amendment of the U.S. Constitution** and state equivalents—such as Article I, Section 7 of the Washington State Constitution—government actors cannot enter your home without fulfilling strict criteria: [1, 2, 3]

- **A Search Warrant:** A judge-signed order based on explicit probable cause.
- **Exigent Circumstances:** Emergency scenarios where immediate safety or destruction of evidence is a factor.
- **Explicit Permission:** Direct, voluntary consent given by the occupant.
- **The Mailman Rule:** Law enforcement may walk onto open walkways or front porches that are generally accessible to the public.
- **The Plain View Doctrine:** Police may act on illegal items or activities that are openly visible from a legal standing point without moving objects. [1, 2, 3, 5]

Neighbor Boundaries & Video Surveillance

Civil and criminal laws govern what a neighbor can see, track, or record near your residence: [1, 2, 3]

- **Interior Living Spaces:** Neighbors are strictly prohibited from filming or spying into windows where an occupant would expect to disrobe or maintain absolute privacy. [1, 2]
- **The Curtilage (Yards and Driveways):** Homeowners generally possess the legal right to monitor their own property with security cameras. However, LegalShield compliance resources emphasize that these cameras must not deliberately target a neighbor's private backyard or be used to intentionally harass or intimidate others. [1]
- **Public Visibility Rule:** If an area of your property is completely visible from a public street or sidewalk, it generally does not carry a reasonable expectation of absolute privacy. [1, 2]

Tenant & Rental Property Protections

If you rent your home, landlords do not have an open-ended right to enter your living space: [1, 2, 3, 4]

- **Mandatory Advance Notice:** State laws dictate how much warning a landlord must give before entering for inspections or non-emergency repairs. For example, the Washington Tenants Union FAQ notes that landlords must provide proper notice, keep reasonable hours, and refrain from utilizing access rights to harass the occupant. [1, 2]
